

IT'S TIME TO MAKE PUBLIC HEALTH FUNDING **A NATIONAL PRIORITY**

February 19, 2008

Dear Member of Congress:

Our nation struggles with escalating health care costs, growing numbers of uninsured, and the prospect of declining health measured by overall morbidity and mortality. The President's budget for FY 2009 continues to seriously underfund and undermine an important part of the solution: public health activities and programs. The investment in disease prevention and health promotion programs for all Americans needs to increase not decrease!

The undersigned organizations urge you to increase funding for all aspects of public health included in the Function 550/discretionary budget allocation in Fiscal Year 2009 by an amount that will: 1) restore funding to public health programs cut in FY 2006; 2) restore lost purchasing power that flat-funding for at least five years has eroded and 3) provide investments that begin to truly meet health challenges facing the nation.

It is estimated that an additional \$5.3 billion will be needed in FY 2009 to meet this goal.

These challenges include:

- **Biomedical and Behavioral Research:** Maintaining a vigorous portfolio of investigator-initiated basic research and pivotal translational and clinical studies to address the myriad health challenges that confront the American people and to develop a stable pool of talented new investigators whose ideas and fresh perspectives are vital to invigorating the research enterprise.
- **Disease Prevention and Health Promotion:** Improving community-based prevention and early intervention activities that address costly chronic diseases, infectious diseases, including those that are becoming increasingly drug-resistant, strengthening public health capacity and ensuring those with disabilities reach their highest potential in function and health.
- **Access to Safety Net Health Care Services:** Assuring access to basic and targeted health care services for the growing numbers of Americans who lack health insurance.
- **Health Professions Education:** Assuring that there is a well-trained, diverse health and public health workforce to serve as the foundation for the nation's health care system.
- **Mental Health and Substance Abuse:** Assuring access to needed mental health and substance abuse services for hundreds of thousands who must wait months for care, including Veterans returning from Iraq and Afghanistan; reducing the 15-20 year lag from bench to bedside of promising new treatments.
- **Health Services Research:** Building the evidence needed to ensure patients get the right care at the right time, every time; providing decision makers with information that will help control unsustainable costs.
- **Health care for American Indians and Alaska Natives:** Reversing current health disparities for this population that now suffers a life expectancy that is four years lower than the general population.
- **Food and Drug Safety:** Assuring the nation has a safe food supply and a safe and effective supply of drugs and medical devices.

Our recommendation does not include, but rather is over and above, emergency funding requests.

To respond to this letter, please contact Dr. Marcia Mabee, Executive Director, Coalition for Health Funding: mmabee@ix.netcom.com; Voice – 703-709-3001; FAX – 703-709-3003; 11479 Waterview, Suite 200; Reston, VA 20190.
