From the Battlefield to the Clinic: Treating America's Newest Veterans

 **Closed Session**
 **Additional Registration Fee**

This is the 60th Anniversary year of Policy Memorandum #2, the VA document which established the partnerships between VA Medical Centers and America's medical schools. This partnership ushered in a new higher quality system of care for the veterans of WWII. It is appropriate today to consider the medical needs of our newest veterans, arising out of their experiences in the Middle East. This session will provide insight into care of the war wounded, from battlefield interventions, to the latest physical rehabilitation techniques and prostheses, to the emerging neurobiology of PTSD.

Vitality is a Leadership Issue

Faculty are the single greatest resource of an academic medical center. Only by ensuring the vitality of this important resource can we meet and hopefully exceed our greatest expectations. And vitality does not flow from a specific program or activity. Rather, vitality is what leaders build within the culture of an organization. In this workshop the core competencies of leaders will be identified and participants will have an opportunity to examine elements of their own leadership behavior.
