Use of Team-Based Learning in Graduate Education for Ph.D. Students in the Biomedical Sciences

Wayne T. McCormack, Ph.D.

Team-Based Learning:

- promotes team work
- enhances problem-solving skills
- ensures that students are prepared and on time to class
- creates a remarkable amount of energy in the classroom

Impact on "Principles of Immunology" Graduate Course

Significantly higher level of student satisfaction for:

- overall course rating
- course format (teaching methods)
- appropriateness of test content
- rating of lectures

Improved performance on one exam

Similar results in course on "Responsible Conduct of Biomedical Research"
