*These data were compiled from a survey of institutions conducted by the MD-PhD Section Communications Committee of the AAMC GREAT Group in 2007. Column headings correspond to specific questions asked in the survey as follows:

Is your program funded by an MSTP training grant?

Are your MD-PhD positions fully funded, partially funded, or both? (inclusive of stipend and tuition and regardless of funding source)

Do you accept applications from internal MD students?

Do you accept applications from internal PhD students?

Do you accept transfer students from other programs?

Does your program admit non-US citizens?

Do you require GRE scores?

Do you require lab rotations in the summer preceding medical school?

Does your program participate in the NIH Graduate Partnership Program (GPP)?

These data are intended as guidelines and are subject to change or revision. Prospective applicants should confirm information about application policies with individual institutions. Note that some institutions did not provide answers to all questions and are recorded as blanks.
