

February 3, 2016

Dear Member of Congress:

The 49 undersigned members of the Health Professions and Nursing Education Coalition (HPNEC) write to thank you for your vote in support of the FY 2016 omnibus spending package, which continued funding for the Health Resources and Services Administration (HRSA)'s Title VII health professions and Title VIII nursing workforce development programs. HPNEC is an informal alliance of national organizations representing schools, programs, health professionals, and students dedicated to ensuring the health care workforce is trained to meet the needs of the country's growing, aging, and diverse population.

We appreciate that Congress worked in a bipartisan manner to pass a spending package that recognizes the importance of quality patient care and a diverse, well-trained health care workforce. These programs help shape the workforce in targeted ways, such as promoting interprofessional, team-based care; promoting service in underserved areas; and filling other gaps in the health care workforce. As communities nationwide grapple with access challenges, we are pleased that Congress worked together to preserve the modest federal investment in HRSA's health professions education programs.

Funding for each of the Title VII and Title VIII programs is key to improving our nation's health as pressures on the workforce increase. We have a nation that is growing and becoming increasingly diverse. At a time when millions of Americans are accessing health care for the first time, it is crucial that we enhance the federal commitment to the programs that equip the next generation of health professionals to keep up with the increasing health care challenges of a changing population.

Again, we commend you for your support in passing this crucial spending package, and we look forward to working with you to prioritize continued support for these programs that are critical to ensuring that the health care workforce meets the needs of all Americans.

Sincerely,
