Notes

For 1995–96 to present, the applicant and matriculant data are derived from AAMC Data Warehouse (DW): Applicant Matriculant File, updated as of 1/4/2010.

Starting with 2000–01, the First-Year Enrollment data are from the Student Records System (SRS).

Starting with 1992–93, the Total Enrollment and Graduates data are from the DW: Student section and SRS; Total Enrollment is reported as of October 31 of the academic year.

Total active enrollments for 1998–99 forward are derived from DW: Student section on 10/19/2009. Graduates for 1995–1996 forward are derived from DW Student section on 7/8/2010.

Differences in Total Enrollment between years may not be statistically significant. Data starting in 1992–93 are biased slightly toward undercounting, as some cases (less than 1%) were necessarily excluded due to insufficient enrollment status information.

[@] 1965–66 First-Year Enrollment count of women is taken from the *Journal of Medical Education*, February 1973, p.188.

[†] 1975–76 Totals include less than one percent for whom gender information was not available.

[‡] 1980–81 Total Enrollment count includes 55 students for whom gender information was not available.

* First-Year Enrollment figures include new entrants and those repeating the initial year.

** 1998–99 First-Year Enrollment counts are taken from the *Journal of Medical Education*, September 1999, p.891.

[^] 1999–00 First-Year Enrollment Total is derived from LCME Part II, 1997–98, 1998–99, and 1999–00. Gender information is not available.
