

Table 1: U.S. Medical School Faculty by Department, 2022

The table below displays the number of full-time faculty at all U.S. medical schools as of December 31, 2022 by department classification. By way of background, the Faculty Roster utilizes the official name given to each department by each medical school. The AAMC department classification is a way to group disparately named (but similar) departments across medical schools. As an example, a medical school could have separate departments of Neurosurgery and Cardiothoracic Surgery. These departments would appear in the Faculty Roster under their official names, but both would be reported in the Surgery department classification.
