Name: _____

Email: _____

Program Director/Faculty Sponsor Contact Information:

Name: _____

Email: _____

Do you consent to have your innovation featured in the OSR Newsletter?

Yes No

Session description

Medical students across the country are involved in a multitude of exciting approaches to medical training, community service, and leadership. The annual OSR Student Programming Showcase highlights student-led innovations in curriculum development, community service, medical education scholarly research, and patient advocacy. The presenters will share unique and successful projects at their home institutions and the impact of student-led innovation at medical school campuses.

Instructions for Submission

Please complete the submission form by **Friday, July 28, 2017**. Please save the file in the following format: 'year'_'school name'_'program name'_'your last name'.doc. E-mail the completed application to Molly Krafcik, mkrafcik@aamc.org.

Five students will be selected to present their programs. Presenters (one presenter per program) may show a maximum of 5 PowerPoint slides and will have 5-8 minutes to speak. Submissions will be reviewed by the OSR medical education committee. Applicants will be notified in August 2017 of submission status.

Note: Presenters do not have to be OSR reps, but must pay the reduced student registration fee. Registration fees for presenters will not be waived.

Project Description:

Please describe the details of your project, including objectives, student involvement, community engagement, funding, impact. Projects may include curricular changes, improvements to the learning environment, community or volunteer initiatives, medical education scholarly research, or patient advocacy. Special consideration will be given to projects that are highly innovative and student-initiated. (max. 500 words)
