College Building on North Market Street immediately north of the Public Square.

ANNOUNCEMENT.

The Regular Faculty of the Medical Department of the University of Tennessee—the Nashville Medical College—will begin a Special Course of Lectures of nine weeks, commencing on

Monday, Feb. 28, and ending Saturday, April 30, 1881

This Course of Lectures will be offered to advanced students and practitioners at one of the most favorable and convenient seasons of the year for obtaining instruction in special departments of Medicine and Surgery.

The principal topics to be presented will be as follows:

Prof. W. K. BOWLING, M. D., L.L. D., Prof. DEERING J. ROBERTS, M. D., Zymotic Diseases and Physical Diagnosis.

Prof. J. BERRIEN LINDSLEY, M. D., State Preventive Medicine.

Prof. GEO. S. BLACKIE, M. D., (Edin.) Ph. D., Urinary Analysis.

Prof. DUNCAN EVE, M. D., Orthopædic Surgery, and Practical Illustrations of Amputations and Resections.

Prof. J. BUNYAN STEPHENS, M. D., Uterine Hæmorrhages and Operative Midwifery.

Prof. THOS. O. SUMMERS, A. M., M. D., Surgical Anatomy and Microscopy.

Prof. W. F. GLENN, M. D., Genito-Urinary Diseases.

Prof. J. S. NOWLIN, M. D., Uterine Displacements and Ovarian Diseases.

Prof. W. M. VERTREES, M. D., Diseases of Infancy and Childhood.

Prof. J. G. SINCLAIR, M. D., Opthalmology and Otology.

Prof. W. G. BRIEN, M. D., LL. D., Medical Jurisprudence.

Prof. PAUL F. EVE, M. D., Prof. JOHN A. ROGERS, M. D. Practical Anatomy.

In addition to the above didactic course, special attention will be given to Clinical Instruction.

The Dissecting Rooms will be open for any amount of practical work that may be desired.

THE FEE FOR THE ENTIRE COURSE WILL BE \$30.

To students who attend and desire to return the following winter, the above fee will be deducted from their regular fall and winter session's tuition...

The instructions throughout will be of a thoroughly practical nature, especially adapted to those students who have made some progress in their studies, and to practitioners who desire to make a brief, yet thorough, practical review of their professional studies, and to whom most excellent opportunities will be offered for obtaining practical instruction in special departments of medicine and surgery.

The friends of the Medical Department of the University of Tennessee—the Nashville Medical College—will be pleased to learn that the last was the most prosperous year of its existence. An uninterrupted prosperity has marked its course from the beginning; the most sanguine could not have expected more. The growth has been rapid and substantial. No similar institution can exhibit a more satisfactory progress. This is a matter of just pride or the part of the Faculty, and of thankfulness on their part for the liberal and kindly assistance of its friends. They hope that this success is not unmerited. It has been their aim to place the institution which they represent fully abreast, if not in advance, of the oldest and best in the land. To this end nothing has been left undone. Fully recognizing the just demand for increased length of courses of instruction, they have been led to add this to the other movements of progress and advance heretofore established. This virtually extends the course to nearly nine months of collegiate instruction.

Didactic lectures will be delivered by the different professors on the subjects assigned them, and in addition frequent examinations during the course will take place upon the subjects presented in the lectures.

Clinics will be held in the College Amphitheatre for both medical, surgical and gynecological cases, at which examinations will be made by members of the class, assisted by the professors, prescriptions given and surgical operations performed in the presence of the class.

The Anatomical Rooms, amply supplied with material, will be open each day for the purpose of enabling such students as may desire to perfect themselves in this important branch, or to familiarize themselves with practical surgery by means of operations on the cadaver.

SPECIAL NOTICE.

In answer to numerous inquiries upon the subject, the Faculty desire to state that this course is for the special benefit of advanced students and regular practitioners, and is entirely distinct from the regular course. No degree whatever will be conferred in connection with this course, but note will be made of proficiency of those who may subsequently apply for graduation.

Good board at from \$3 to \$4 per week.

For additional information, address

DUNCAN EVE, M. D., Dean, 159 Church St., Nashville, Tenn. The regular winter session of 1881-82, of the Medical Department of the University of Tennessee, the Nashville Medical College, will begin Monday, September 5th, 1881.

The regular annual announcement and catalogue will be sent on application to

Duncan &ve, M. D.. Dean, 159 Church Street,

Nashville, Tenn.

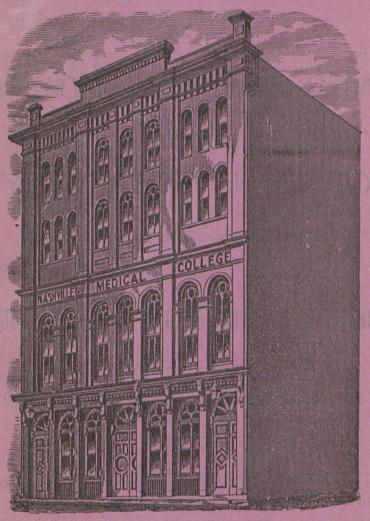

Member of the American Medical College Association.

LITERARY AND SCIENTIFIC DEPARTMENT OF THE UNIVERSITY OF TENNESSEE.

The Literary and Scientific Department of the State University is located at Knoxville.

ANNOUNCEMENT.

The Course of Instruction will begin on Monday, the 6th day of September, 1880, and continue until the last Tuesday in February, 1881, which is Commencement Day.

In issuing the announcement of the sixth course of Lectures, the Faculty of the Medical Department of the University of Tennessee,—Nashville Medical College—feel that it is no mere formality to congratulate its Alumni and friends upon the continued and unprecedented success of the school. It will be observed that in addition to the largely increased number of matriculates, important accessions have been made to the Faculty.

METHOD OF INSTRUCTION.

In making this announcement, the Faculty would impress upon the mind of the student their earnest endeavor to impart such thorough, practical instruction in every department of Medicine, as to fully qualify him for the intelligent and successful practice of his profession. To this end, the student will be taught by lectures, recitations, and at the bed-side of patients, both in private practice and hospitals. Perfect representations of healthy and morbid tissues, as illustrated by models in wax or plaster, will be used in conjunction with the scalpel and microscope, for the purpose of demonstration. The requisite facility in the use of these instruments of research can thus be acquired by the student.

Special attention is called to the fact that the Faculty represents a greater number of specialists than any similar institution in the South or West. The various branches have been so divided and sub-divided as to enable each Professor to give a thorough and exhaustive course upon his respective department. The student is thereby fully qualified for the practice of Medicine as a whole, or in any specialty he may desire.

EXAMINATION.

Each Professor will examine the class upon his own Lectures as the Course proceeds, thus compelling the mind of the student to pass in review the subject matter of each lecture.

COLLEGE BUILDING AND LOCATION.

The College Building presents an elegant and imposing appearance, and in its interior arrangements nothing has been omitted which could render it thoroughly adapted for medical teaching. The general Lecture Room is large, well provided with chairs, and will comfortably seat five hundred students. Around this are arranged balconies for anatomical specimens, Above this story is the Amphitheater, which also is large, and well lighted by a skylight and windows. The seats are here so arranged that every student can easily see any operation or demonstration performed. Above this again are the Dissecting Rooms, which are well ventilated, and supplied with all the conveniences for the study of Practical Anatomy. composed of six students, has a separate room, so that its members are not troubled by the noise of other classes. Material is plentiful, and will be furnished at a moderate price.

The College is situated in the center of the city, within fifty yards of the public square; within a short distance of the State Capitol, and surrounded by a dense population, making it by far the best location of any Medical College Building in the

country.

MUSEUM.

The Emeritus Professor of Anatomy has kindly presented to the College his very large and valuable Museum. This, together with drawings, plates, models, and enriched by the splendid cabinet of the late Prof. Paul F. Eve, M. D., forms a most invaluable collection.

LIBRARY.

A Medical Library has been placed in the Library Room of the College by the Faculty, for the purpose of promoting a spirit of scientific research and literary culture. It will be accessible to students under appropriate regulations.

CLINICAL ADVANTAGES.

The union of clinical with didactic teaching is carried out to the fullest possible extent in the curriculum. For this purpose, A Free College Clinic has been established by the Faculty (besides the six lectures and demonstrations daily), and there will be a great number of diseases and injuries in all the departments of medicine and surgery furnished for observation and diagnosis; their peculiarities explained; the proper treatment prescribed, and surgical operations performed in the presence of the class.

SPECIAL EXPLANATIONS.

It is with pleasure the Faculty announce that Doctors W. K. Bowling and J. Berrien Lindsley, whose names are familiar to every medical man in America, have accepted positions and are assigned respectively to the departments of Theory and Practice of Medicine, and State Preventive Medicine.

Dr. T. O. Summers, Jr., late Professor of Anatomy in the medical department of the University of Nashville and Vanderbilt University, and formerly Professor of Physiology and Chemistry in the Southern University in Alabama, a gentleman distinguished as a scientist, has also been elected and assigned the chair of Physiology.

Dr. J. C. Park, of Knoxville, Tenn., has kindly accepted an invitation of the Faculty to deliver a series of lectures during the session of 1880-81.

ANATOMY AND VENEREAL DISEASES.

PROFESSOR WM. F. GLENN, M. D.

In the department of Anatomy, every effort will be made to give the student a thorough knowledge of the human organism. To this end, it will be taught by lectures and demonstrations on wet subjects, assisted by the use of plates, models, dried preparations, etc.

Persons affected with venereal diseases will be frequently exhibited, and careful explanations given as to diagnosis, treatment, etc.

CHEMISTRY AND TOXICOLOGY.

PROFESSOR GEORGE S. BLACKIE, M. D., (Edin.) Ph. D., etc.

The course will be comprised in about sixty lectures. These will be opened by an exposition of the principal outlines of the facts and theories relating to Pneumatics, Heat, Light, and Electricity. This appears necessary, as many students come to College without having a previous acquaintance with the facts of Physics according to modern views, and they will be thereby enabled to grasp a knowledge of Chemistry without further introduction. The other Lectures will embrace: 1. The Principles of Chemical Philosophy; the laws of Chemical Combinations, and of Chemical Affinity in general. 2. The history of the Elementary Bodies, both metallic and non-metallic, their properties, and the means of detecting their presence. 3. The so-called §" Organic Bodies," especially those of most value to physicians.

Throughout the course, special attention will be paid to the application of Chemistry to Medicine and Pharmacy.

The Lectures will be abundantly illustrated throughout with experiments.

PHYSIOLOGY. PROFESSOR T. O. SUMMERS, M. D.

In this department every effort will be used to make the student well acquainted with Physiology. very lecture setting forth physiological facts, will be fully illustrated by experiments, vivisections, etc., upon the lower animals. During the course the student will be carefully instructed as to Chemical and Microscopical examination of urine. Special attention will be given to that grand division of the science of physiology, viz.: the Nervous system, and numbers of experiments will be made, showing the *modus operandi* of the vital apparatus.

MATERIA MEDICA AND THERAPEUTICS. PROFESSOR W. M. VERTREES, M. D.

In this department special attention will be directed to the application of remedies in the treatment of diseases—the indications for their use—the effect of medicines, and their modes of action. The subjects constituting the Science of Therapeutics are regarded as the most important topics assigned to the Chair.

Special attention will be given to remedies that are not officinal preparations, especially showing the influence of various impressions of the mind upon diseases.

PRINCIPLES AND PRACTICE OF MEDICINE. PROFESSORS W. K. BOWLING, M. D., AND DEERING J. ROBERTS, M. D.

Upon this important branch, it will be the design of the Professors to make the generally received facts of modern medicine clear and intelligible to the mind of the student. They will endeavor to be as critical and practicable as possible, and to so direct the studies of the students as to facilitate their reading. Clinical medicine will also receive a large share of their attention.

SURGERY AND CLINICAL SURGERY. PROFESSOR DUNGAN EVE, M. D.

The Professor of Surgery, independent of didactic teaching and demonstrations, proposes to introduce Clinics daily, and every facility will be afforded to the class for witnessing surgical operations. In addition to the clinics the hospital may afford, cases will be selected from his practice as railroad surgeon, and also from his private practice, and that of his professional friends.

OBSTETRICS AND CLINICAL MIDWIFERY. PROFESSOR J. BUNYAN STEPHENS, M. D.

The Professor of Obstetrics hopes to impress upon the minds of the students the more important and practical features of modern Obstetricy. To accomplish this, women in confinement coming under the charge of this teacher or his colleagues, will be, when practicable, placed under the management of one or more second course students, who, by the instructor in this department, will be taught at the bedside, the presentation and positions of the fœtus at birth—the science of the mechanism, and manual and instrumental management of labor.

MEDICAL AND SURGICAL DISEASES OF WOMEN. PROFESSOR J. S. NOWLIN, M. D.

The course in this important department of Medical Science will comprise a series of sixty lectures, fully illustrated by models and wet anatomical preparations. Particular attention will be given to the subject of diagnosis, and the vari-

ous steps in this difficult branch will be carefully demonstrated by clinics. For imparting to the student a practical knowledge of the subject, it is hoped this course of instruction will compare favorably with that of any other College. As the Professor makes this department a specialty, he will always select such clinics from his private practice as can be brought before the class, to illustrate his teachings.

DISEASES OF THE EYE, EAR, AND THROAT. PROFESSOR J. G. SINCLAIR, M. D.

These branches of Medicine will be taught clinically, thus enabling the general practitioner to obtain a practical knowledge (diagnostic and therapeutical) of the most common affections of the Eye, Ear, and Throat, which he will inevitably be called upon to treat, and to recognize those more intricate and dangerous ones, which require the skilled attention of the Opthalmologist, etc. The students will also be taught the use of the various and numerous instruments required in these departments, and also the proper handling of the same. Special instructions will be given in the use of the Opthalmoscope. Cases will be operated on before the class, whenever the subject under consideration demands such an illustration. These can be abundantly supplied from the Charity Clinic.

STATE PREVENTIVE MEDICINE. PROFESSOR J. BERRIEN LINDSLEY, M. D.

The great prominence which this branch of medical science and practice has assumed within a period of twenty years, leaves the medical student of the present day no option for ignorance. The repeated epidemics of recent years have stimulated the whole country, more especially the South and West, to great activity in sanitary reform. Boards of Health are everywhere the order of the day. Aware of the heavy pressure made upon the student's time and energies, nothing will be attempted by the lecturer, beyond an outline of the great principles of Public Hygiene, and such special instructions as will enable the pupil to at least comprehend the duties of a Health officer and of a Health Board.

MEDICAL JURISPRUDENCE. PROFESSOR W. G. BRIEN, M. D., LL. D.

The Faculty take pleasure in announcing that they have secured the services of a teacher specially qualified for imparting instruction on this important subject.

The Lectures will consist of a critical examination of all those questions which have been, or which may become, subjects of judicial inquiry in suits for alleged malpractice; and evidence and opinions necessary to be given by medical men in suits of law and equity.

DENTAL SURGERY. PROFESSOR ROBERT RUSSELL, M. D., D. D. S.

The chair of Dental Surgery has been created to meet the wants of the country practitioner in the extraction of teeth, to differentiate troubles of the face caused from carious teeth, from other face troubles, etc., etc.

PRACTICAL ANATOMY. DRS. PAUL F. EVE, AND J. A. ROGERS.

With due appreciation of the importance of this fundamental branch of our science, we consider a thorough practical knowledge of the anatomical structure of the human system an indispensably prerequisite for graduation. Therefore, every student at this College is required to dissect. The Dissecting Room is under the direct supervision of the Professor of Anatomy.

REQUIREMENTS FOR THE DEGREE OF DOCTOR OF MEDICINE.

- 1. The candidate must be twenty-one years of age, and of good, moral character.
- 2. He must have been a student of medicine for three years, which shall include attendance on two full courses of Lectures, the last of which must have been in this institution. The first may have been in any other generally recognized Medical College.
- 3. He must have attended the dissections in this school during the time he was a student thereof.
 - 4. He must pass a satisfactory examination by the Faculty.
 - 5. He must have paid in full for all college tickets.

FEES, Etc.

Matriculation Fee (paid but once)\$ 5 00	
For a full Course of Lectures. 50 00	
Demonstrator's Fee	
Clinical Instruction	
Graduation	

In answer to the many inquiries relative to the cost of attendance upon a Course of Lectures at the Medical Department of the University of Tennessee, Nashville Medical College, the Faculty would most respectfully say to medical students and their preceptors, that this Institution offers as great or greater inducements to the student, and at a less cost, than any other regular Institution in this country. College fees are moderate, boarding, fuel, and lights cheap, rooms to rent at moderate prices; and if students wish to practice economy, they may bring their entire expenses for the College session within the bounds of \$125, and in no case should it exceed \$150.

Good board can be procured at three to five dollars per week.

Any further information will be cheerfully furnished by the Dean, to whom all communications should be addressed.

TEXT-BOOKS RECOMMENDED.

Anatomy—Gray or Wilson.
Physiology—Dalton, Flint, Kirk, Carpenter.
Chemistry—Fownes, Roscoe, Kollmyer's Chemia Coartata, Attfield.
Principles and Practice—Roberts, Aitken, Watson, Flint,
Materia Medica—Biddle, Stille, Woods, National Dispensatory.
Surgery—Hamilton, Gross, Bilroth.
Obstetrics—Playfair, Leishman, Cazeaux.
Diseases of Women—Thomas, Barnes, Emanet.
Principles of Surgery—Billroth or Paget.
Clinical Medicine—Trosseau, DaCosta.
Diseases of the Eye, Ear, and Throat—Wells, Stellwag, Jones, Toynbee, Troeltch,
Cohen.
edical Jurisprudence—Elwell, Taylor, Beck, Wharton, and Stille.

DIRECTIONS TO STUDENTS.

Students, on arriving in the city, should call immediately upon the Dean, at the office of Drs. Duncan and Paul F. Eve, 159 Church street, corner of Vine, or take a street car at the depot, as all street car lines pass within a short distance (50 yards) of the College. At the Dean's office (always open), or at the College, students will be directed to good boarding houses.

DUNCAN EVE, M. D.

Dean of Faculty.

N. B.—Physicians or students having specimens or preparations of Morbid Anatomy, Natural History, etc., and wishing to send the same to the College Museum, can do so at the expense of the Faculty. Upon receipt, the donor's name and address will be carefully placed upon the specimen before turning it over to the Curator.

HONORARY DEGREE.

WILLIAM HARRISON CHRISTOPHER.....Tennessee.

AWARD OF PRIZES.

The Paul F. Eve Faculty Medal to James Polk Wallace, of Tennessee, who also received a prize in the Department of Opthalmology and Otology, and the prize offered to the members of the University Quiz Class for excellence in all branches.

The second Faculty prize to James T. Reddick, of Tennessee, who also received the first prize in the Department of Theory and Practice of Medicine, and the first prize in the Department of Obstetric Medicine.

The first prize in the Department of Materia Medica to Charles N. Allen, of Kentucky, who was also awarded a prize in the Department of Medical Jurisprudence.

The first prize in the Department of Medical Jurisprudence to C. D. Russell, of Tennessee.

The second prize in the Department of Theory and Practice of Medicine to George W. Morris, of Tennessee.

The second prize in the Department of Materia Medica to William H. Bumpas, of Tennessee.

The second prize in Obstetric Medicine to Eddie Rust, of Tennessee (a first course student).

Advanced Students' and Practitioners' Course.

The Faculty of the Medical Department of the University of Tennessee—the Nashville Medical College—will begin a Special Course of Lectures of nine weeks, commencing on Monday, February 28th, and ending Saturday, April 30th, 1881.

This Course of Lectures will be offered to advanced students and practitioners at one of the most favorable and convenient seasons of the year for obtaining instruction in special departments of Medicine and Surgery.

The principal topics to be presented will be as follows:

Prof. Geo. S. Blackie, M. D., (Edin.) Ph. D., Urinary Analysis.

Prof. Deering J. Roberts, M. D., Zymotic Diseases and Physical Diagnosis.

Prof. Duncan Eve, M. D., Orthopædic Surgery, and Practical Illustrations of Amputations and Resections.

Prof. J. Bunyan Stephens, M. D., Uterine Hemorrhæges and Operative Midwifery.

Prof. Thos. O. Summers, A. M., M. D., Surgical Anatomy and Microscopy.

Prof. W. F. GLENN, M. D., Genito-Urinary Diseases.

Prof. J. S. Nowlin, M. D., Uterine Displacements and Ovarian Disease.

Prof. W. M. Vertrees, M. D., Diseases of Infancy.

Prof. J. G. Sinclair, M. D., Ophthalmology and Otology.

Prof. W. G. Brien, M. D., LL. D., Medical Jurisprudence.

In addition to the above didactic course, special attention will be given to Olinical Instruction.

The Dissecting Rooms will be open for any amount of practical work that may be desired.

THE FEE FOR THE ENTIRE COURSE WILL BE THIRTY DOLLARS.

To students who attend and desire to return the following winter, the above fee will be deducted from their regular fall and winter session's tuition.

SPECIAL NOTICE.

In answer to numerous inquiries upon the subject, the Faculty desire to state that this course is for the special benefit of advanced students and regular practitioners, and is entirely distinct from the regular course. No degrees whatever will be conferred in connection with this course.

THIRD

ANNUAL ANNOUNCEMENT

OF THE

DENTAL DEPARTMENT

OF THE

UNIVERSITY OF TENNESSEE,

NASHVILLE.

FACULTY.

THOMAS W. 'HUMES, D. D., S. T. D.,
President University of Tennessee.

ROBERT RUSSELL, M. D., D. D. S., Professor of Operative Dentistry.

> L. C. CHISHOLM, D. D. S., Professor of Dental Mechanism.

J. Y. CRAWFORD, D. D. S., Professor of Clinical Dentistry.

DUNCAN EVE, M. D.,
Professor of Oral Surgery and Clinical Surgery.

GEORGE S. BLACKIE, M. D., (Edin.) Ph. D., Professor of Chemistry and Metallurgy.

W. M. VERTREES, M. D.,
Professors of Materia Medica and Therapeutics.

WILLIAM F. GLENN, M. D., Professor of General and Special Anatomy.

T. O. SUMMERS, M. D., Professor of Physiology and Microscopy.

W. L. DISMUKES, D. D. S., GILLINGTON CHISHOLM, D. D. S., Demonstrators of Operative and Mechanical Dentistry.

J. FAIN STEPHENS, M. D., D. D. S., Assistant Demonstrator of Mechanical Dentistry.

> PAUL F. EVE, M. D., JOHN A. ROGERS, M. D., Demonstrators of Anatomy.

CLINICAL INSTRUCTORS.

F. A. BADGER, D. D. S. ALEX. HARTMAN, D. D. S. J. J. MOORE, D. D. S.

E. S. CHISHOLM, D. D. S.
D. S. W. C. SHEPARD, D. D. S.
C. W. MUNSON.

ANNOUNCEMENT.

In making this announcement, the Faculty would impress upon the mind of the student their earnest endeavor to impart such thorough, practical instruction in every department of Dentistry as to fully qualify for the intelligent and successful practice of the profession.

The Third Annual Session of this Institution will commence on the second day of October, 1880, and continue until the last Tuesday in February, 1881, which is Commencement Day.

CLINICAL ADVANTAGES.

The union of clinical with didactic teaching is carried out to the fullest possible extent in the curriculum. For this purpose, A Free College Clinic has been established by the Faculty, and there will be a great number of diseases in all the departments of Dentistry furnished for observation and diagnosis; their peculiarities explained; the proper treatment prescribed, and operations performed in the presence of the class.

Students of this College will have all the privileges of medical students. They can attend the medical as well as the surgical clinics, witness all operations, etc., obtaining a great amount of varied practical information. Aside from much bearing directly upon the specialty of Dental Surgery, Dislocations, Fractures, Necrosis and Exsections of the Maxillary Bones are frequently to be seen.

Every student is required to provide his own instruments, except those for extracting. He is expected to keep them in perfect order, and will be provided with a place in which they can be locked when not in use.

QUALIFICATIONS FOR GRADUATION.

The candidate must be twenty-one years of age, and of good moral character. He must have studied under a private preceptor at least two years, including his course of instruction at the College. Attendance on two full courses of lectures in this Institution will be required, but satisfactory evidence of having attended one full course in any regular Dental or Medical College, will be considered equivalent to the first course of lectures in this College. Also satisfactory evidence of having been in practice five years, inclusive of the term of pupilage, will be considered equivalent to one course of lectures. He must pass a satisfactory examination by the Faculty, and must have paid for all College tickets.

FEES.

Matriculation Fee (paid but once)	8 5	00
For a Full Course of Lectures	50	00
Demonstrator's Fee		
Graduation	10	00

Good board can be had at from three to five dollars per week.

Students or Dentists desiring further information relative to this department, should address the Dean, and should give in their communications their name, town, county and State.

ROBERT RUSSELL, D. D. S.,

ANNOUNCEMENT

OF THE

UNIVERSITY OF TENNESSEE,

KNOXVILLE, TENN.,

FOR

1880-81.

FACULTY.

REV. THOS. W. HUMES, S. T. D., President, and Professor of History and Philosophy.

> HUNTER NICHOLSON, Professor of Natural History and Geology.

EBEN ALEXANDER, B. A.,
Professor of Ancient Languages and Literature.

SAMUEL H. LOCKETT, M. A., Professor of Applied Mathematics.

WILLIAM G. BROWN, B. S., Professor of General and Agricultural Chemistry.

EDWARD S. JOYNES, M. A., LL. D., Professor of Modern and English Languages and Literature.

> JOHN M. McBRIDE, Professor of Agriculture and Horticulture.

> JAMES DINWIDDIE, M. A., Professor of Mathematics.

SAMUEL B. CRAWFORD, A. M., Professor of Military Tactics and Instructor in Mathematics.

WILLIAM G. McADOO, A. M., Instructor in English and History, and Librarian.

THOMAS O. DEADERICK, A. M., Instructor in Ancient Languages.

> WILLIAM E. MOSES, Instructor in Chemistry.

MAURY NICHOLSON, B. S., Assistant in Analytical Chemistry.

> GUSTAV R. KNABE, Instructor in Music.

ORGANIZATION.

The University is organized into the following schools, in each of which the course of instruction is divided into several classes of successive grades:

- 1. Mathematics.—Embracing Algebra, Geometry, Analytical Geometry, Trigonometry, Differential and Integral Calculous.
- 2. APPLIED MATHEMATICS.—Surveying, Drawing, Descriptive Geometry, Shades and Shadows, Physics, Mechanics, Astronomy, Engineering.
- 3. Chemistry.—General Chemistry, Organic Chemistry, Analytic Chemistry, Agricultural Chemistry, Mineralogy.
- 4. NATURAL HISTORY AND GEOLOGY.—Physical Geography, Physiology, Zoology, Geology, theoretical and applied.
- 5. AGRICULTURE AND HORTICULTURE.—Elementary Botany, Structural and Physiological Botany, Agriculture and Horticulture, theoretical and applied.
 - 6. Ancient Languages.—Latin and Greek, the usual classical course.
- 7. Modern Languages and English.—French and German, two years course in each. English—Composition, Rhetoric, Philology, Literature.
- 8. History and Philosophy.—History—General History, and History of Civilization. Philosophy—Mental Philosophy, Logic Moral Philosophy, and Christia Evidences, Political Economy, and Constitution U. S.

PREPARATORY INSTRUCTION, for one year, is given in Mathematics, Ancient Languages, and English branches (or in any one or more of these studies), to students who are unprepared to enter University Classes. Such studen s will be under the same government as other matriculates.

THE MILITARY DEPARTMENT embraces Military Tactics, drill and discipline, which are required of all students. A suitable uniform is also prescribed. But the military requirements are held subordinate to the moral government of the University, and to its larger educational purposes.

COURSES OF STUDY.

The foregoing classes are arranged, by a common schedule of hours, into the following systematic courses of study, to each of which is attached its appropriate Degree or Certificate. The student may select his course, subject to the general regulations of the University:

- I. GENERAL COURSES, of four years each.
- 1. Course of Science and Modern Literature. Degree Bachelor of Science, (B. S).
- 5. Course of Classical and Modern Literature and Science. Degree Bachelor of Arts (A. B.)

- II. TECHNICAL COURSES, of four years each.
- 1. Course of Civil Engineering-Degree, B. C. E.
- 2. Course of Mechanical Engineering-Degree, B. M. E.
- 3. Course of Mining Engineering-Degree, B. Min. E.
- 4. Course of Agriculture-Degree, B. Agr.
- 5. Course of Applied Chemistry-Degree, B. Ap. C.
- III. PARTIAL COURSES, of two years each.
- 1. Course of Applied Mathematics-Surveyor's Certificate.
- 2. Course of Practical Agriculture-Agricultural Certificate.
- 3. Normal Course, for Teachers-Teachers' Certificate.
- 4. Business Course (at present one year only), in Penmanship, Bookkeeping and Stenography—Certificate.
- IV. Special Courses, of one or two years, with appropriate Certificate, may be allowed by the Faculty on satisfactory application, especially in subjects relating to Agriculture or the Mechanic Arts.

MISCELLANEOUS INFORMATION.

LOCATION.

The University of Tennessee is located at Knoxville, on a commanding site overlooking the Tennessee River, and in the midst of a region celebrated for beauty and healthfulness. It is on the line of the E. T. Va. & Ga. Railroad, and offers every advantage of access, climate, comfort, and cheapness of living.

RELATION TO THE STATE.

This Institution is the recognized State University of Tennessee. As such, it is connected, by Act of Legislature, with the Public School system of the State, and holds other valuable franchises. In 1869, it received from the State, in trust, the funds arising from the sale of public lands donated by Act of Congress for the endowment of Colleges, for the benefit of Agriculture and the Mechanic Arts. Since that time, the courses of study have been enlarged and multiplied, in accordance with the purpose of this endowment, affording, in addition to the usual University courses, special facilities in the line of Scientific and Industrial education.

SESSION.

The University Session consists of two terms, without intermission. The first term begins the first Thursday in September, and continues twenty weeks; the second continues also twenty weeks, closing with Commencement Day. It is very important that the student should, if possible, enter at the beginning of the first term.

ADMISSION, ETC.

Students must not be less than fifteen years old. For admission to any class, an examination will be required on the studies of the preceding class, or their equivalent. Examinations are held at the end of each term, or oftener; and results are recorded, and reported to parents or guardians. A student is not allowed to progress with his class, unless he maintains a fair proficiency in its studies.

FREE TUITION.

Free tuition is granted by law to State appointees. These are appointed (three by each Representative and two by each Senator of the State Legislature), and are entitled to continuance until their course of study is completed, unless removed for cause. The County and City Superintendents of Public Schools will hold, in May or June of each year, competitive examinations of applicants for such appointment. Free tuition is also granted to postgraduates, and to Normal students preparing to teach. These must be recommended by some competent school officer.

TRANSPORTATION.

Reduced transportation, and in case of necessity, free transportation, for students to and from the University, over several lines of railroad in Tennessee may be had upon application to the President of the University.

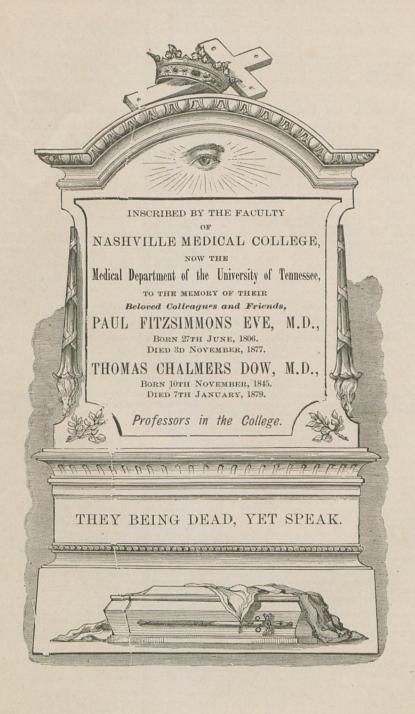

EXPENSES FOR TERM OF TWENTY WEEKS.

Tuition in all Departments	\$15	00
Incidental Fee.	6	00
Room Rent	3	
Gas	2	00
Library Fee	7	00

Tuition fee to be deducted as above. Students in the Laboratory are charged \$5.00 for materials consumed. Special charge may be made for damages. Board may be had at from \$2.00 to \$2.50 a week. Fuel for about \$5.00 a year. The entire annual cost for a student, lodging in the Dormitories, need not exceed one hundred and thirty dollars, besides tuition fee, books, and clothing.

FURTHER INFORMATION

May be found in the University Catalogue, which may be had on application to Rev. Thos. W. Humes, President, Knoxyille.

THE AMERICAN MEDICAL COLLEGE ASSOCIATION.—ARTICLES OF CONFEDERATION.

(To be subscribed and conformed to by all the Colleges of the Association.)

ARTICLE .-OFTHE FACULTY.

The medical members of the Faculty must be regular grandates or licentiates and practitioners of medicine, m good standing, using the work "regular" in the sense commonly understood in the medical profession. The majority of the members of one Faculty shall not constitute the majority of the members of another Faculty, unless the sessions of the two schools are held simultaneously

ARTICLE II.-OF TUITION.

SECTION I. The scheme of tuition shall provide for a yearly systematic course of instruction, covering the general topic of Anatomy, including Dissections. Physiology, Chemistry, Materia Medica and Therapeutics, Obstetrics. Surgery, Pathology, and Practice of Medicine. The Collegiate session wherein this course is given shall be understood as the "regular" session.

SEC. 2. Said regular session shall not be less than twenty weeks in duration.

SEC. 3. Not more than one regular session, counting the regular session as one of the two courses of instruction required for graduation, shall be held in the same year.

ARTICLE III.-REQUIREMENTS FOR GRADUATION.

No person, whether a graduate in medicine or not, shall be given a diploma of "Doctor of Medicine" who shall not have filled the following requirements, except as hereinafter provided for in Article IV:

Article IV:

1. He must produce satisfactory evidence of good moral character, and of having attained the age of twenty-one years.

2. He must file a satisfactory evidence of having studied medicine for at least three years under a regular graduate, or licentiate and practitioner of medicine, in good standing, using the word "regular" in the sense commonly understood in the medical profession. No candiaate shall be eligible for final examination for graduation unless his term of three years' study shall havebeen completed, or shall expire at a date not later than three months after the close of the final examinations. This section to take effect at and after the session of 1879-80.

3. He must file the proper official evidence that, during the above-mentioned three years, he has matriculated at some affiliated college or colleges for two regular sessions, and in the course of the same (except as provided in 4) has attended two foll courses of instruction on the seven topics mentioned in Article II. But the latter, at least, of the two full courses must have been attended at the colege issuing the diploma. No two consecutive courses of instruction shall be held as satisfying the above requirements, unless the time between the beginning of the first course and the end of the second is greater thain fifteen months.

4. In case a college shall adopt a systematic graduated scheme of tuition, attendance on the whole of the same shall be equivalent to the requirements mentioned in 3, provided such scheme includes instruction in the seven topics mentioned in Article II, and requires attendance at least at two yearly regular collegiate sessions of not less than twenty weeks' duration each.

5. The candidate must have passed a personal examination before the Faculty on all seven of the branches of medicine mentioned in Article II.

6. He must have paid in full all college dues, including the graduation fee.

ARTICLE IV .- OF HONORARY DEGREES.

An honorary degree of "Doctor in Medicine" may be granted, in numbers not exceeding one vearly, to distinguished physicians or scientific men of over forty years of age. But in such case the diploma shall bear acrosd its face the word "Honorary" in conspicuous characters, and the same word shall always be appened to the name of the recipient in all lists of graduates.

ARTICLE V.-OF FEES.

ARTICLE V.—OF FEES.

SECTION 1. All fees shall be paid in lawful money, and no promisory notes or promises to pay, shall be accepted in lieu of cash tor payment of fees.

SFC. 2 No ticket or other certificate of attendance upon college exercises shall be issued to any student until the dues for the same shall have been furly paid.

SEC. 3. The established fees for the exercises of the regular session—except the matriculation fee, graduation fee, fee for dissections—may be reduced not more than one-half to graduates of other affiliated colleges of less than three years' standing, and to undergraduates of the same who have already attended two full courses of the instruction of the regular session.

SEC. 4. The same fees may be remitted altogether to a college's own alumni, to graduates of other affiliated colleges of there years' standing (the three years' standing from the time of graduation, and ending at the close of the regular session for which the tickets are given), to undergraduates who have already attended two full courses of the instruction of theregular session, the latter of which at least shall have been in the college fmaking the remission and to theological students when not candidates for a diploma.

SEC. 5. The same fees may be reduced or remitted to deserving indigent students, to a number not exceeding five per cent. of the number of matriculates at the previous regular session of the college.

SEC. 6. Under no circumstances whatever, other than the above, shall the Faculties, or any members of the same, grant upon their own authority any remission or reduction of established fees, and it is distinctly understood and agreed that the Faculties will discountenance and oppose the authorizing, by governing boards, of the admission of individual students on other than the regularly established charges for their grade.

SEC. 7. Remission or reduction of fees for other exercises than those of the regular session, return to a student of any student's fees, or part thereof, shall be deemed a violation

ARTICLE VI.-OF RECOGNITION OF OTHER COLLEGES.

No college shall admit to the privileges accorded in Articles III and V, the students or graduates of any college which, during any period of the student's or graduate's pupilage, shall have been excluded from the list of affiliated colleges recognized by the Association.

ARTICLE VII.-ADVERTISEMENTS.

No college shall advertise in any other than a strictly medical publication the names of it protessors, with their respective chairs.

ARTICLE VIII.-ADMENDMENTS.

Amendments to these Articles shall be proposed and adopted in the manner prescribed for amendments to the Constitution.
