

Learning Spaces in Health Education

Current Context

NOVEMBER 5, 2008

"Context Map" / Graphic Guide #3 ©1996

This map outlines the learning spaces trends in health education and in the broader education community. The map includes political, economic, and technology factors that influence the design, building, maintenance and programming of learning spaces. This map should serve as a starting point for thinking about and developing learning spaces in health education. Stakeholders from groups on Educational Affairs (GEA), Information Resources (GIR) and Institutional Planning (GIP) are essential stakeholders in a building project and participated in development of this map.

Facilitated by Kevin H. Souza (UC San Francisco), kevin.souza@ucsf.edu during a joint GEA, GIR, GIP small group discussion at the 2008 AAMC Annual Meeting.
