

MIPS APM Scoring for Eligible Clinicians in Shared Savings Program

Fed. Reg. 81 Pg. 77260

MIPS Performance Category	Data Submission Requirement	Performance Score	Weight
Quality	Submit quality measures to CMS web Interface for participating eligible clinicians	MIPS quality performance category requirements and benchmarks will be used to determine category at ACO level	50%
Cost	MIPS eligible clinicians not assessed	Not applicable	0%
IA	ACOS only need to report if CMS-assigned improvement activities scores is below the maximum improvement activities score.	CMS will assign same improvement activities score to each APM entity group based on activities required of shared savings program. All ACO participants group's TINs will receive one half of the possible points at a minimum. ACOs will have opportunity to report additional improvement activities to add points.	20%
ACI	All MIPS eligible clinicians submit according to MIPS requires and performance assessed as a group through their billing TINs associated with the ACO	All of ACO participant group billing scores aggregated, as a weighted average based on number of MIPS eligible clinicians to yield one group APM entity score	30%

MIPS APM Scoring for Eligible Clinicians in Next Generation

Fed Reg. 81 Pg. 77264

MIPS Performance Category	Data Submission Requirement	Performance Score	Weight
Quality	Submit quality measures to CMS web Interface for participating eligible clinicians	MIPS quality performance category requirements and benchmarks will be used to develop ACO MIPS quality score.	50%
Cost	MIPS eligible clinicians not assessed	Not applicable	0%
IA	Next Gen only needs to report improvement activities data if CMS-assigned improvement activities score is below maximum improvement activities score.	CMS will assign same improvement activities score to each APM entity group based on activities required of Next Gen. Model participants. All ACO eligible clinicians will receive one half of the possible points at a minimum. All MIPS eligible clinician scores will be aggregated and averaged to one ACO score.	20%
ACI	All MIPS eligible clinician's in APM Entity group reports ACI information to MIPS through either group reporting at TIN level or individual reporting.	All of MIPS eligible clinician scores will be aggregated and averaged to yield one ACO score. An ACO eligible clinician that does not report this performance category would contribute a score of zero.	30%

MIPS APM Scoring Other (not MSSP or Next Gen)

Fed. Reg. 81 Pg. 77269

MIPS Performance Category	Data Submission Requirement	Performance Score	Weight
Quality	The APM Entity group would not be assessed on quality in first performance period. APM submits quality measures as required by APM.	N/A	0%
Cost	MIPS eligible clinician	Not applicable	0%
IA	APM entities only need to report improvement activities data if the CMS-assigned improvement activities scores is below the maximum improvement activities score.	CMS will assign the same improvement activities score to each APM Entity group based on the activities required of participants in the MIPS APM. All ACO eligible clinicians will receive one half of the possible points at a minimum. All MIPS eligible clinician scores will be aggregated and averaged to one ACO score.	25%
ACI	Each MIPS eligible Clinician in the APM Entity group reports advancing care information to MIPS through either group reporting at the TIN level or individual reporting.	CMS will attribute one score to each MIPS eligible clinician in the APM Entity group. This score will be the highest score attributable to the TIN/NPI combination of each MIPS eligible clinician, which may be derived from either group or individual reporting. The scores attributed to each MIPS eligible clinician will be averaged to yield a single APM Entity group score.	75%
