Since Project CORE began, the initial five participating academic medical centers (AMCs) saw measurable impact in the first three years.

- **By year three, 83% of PCPs used eConsults.**
- **$8 million in estimated savings to Medicare due to more efficient specialty use.**
- **Timely access to specialty care improved by 84%.**
- **No-show rates to CORE specialties decreased by 17%.**
- **For every specialty visit averted, eConsults saved patients $100 in avoided copays, transportation costs, and missed work.**

As of 2022, Project CORE has expanded across the country, benefitting:

- **More than 4,000 PCPs**
- **More than 3.5 million primary care patients**

"eConsults have lessened patient wait times, reduced unnecessary referrals, and improved collaborative efforts amongst providers. Hope to see all specialties utilizing eConsults in the future."

—Participating AMC PCP

The project described was supported by Grant Number 1C1CMS331324 from the Department of Health and Human Services, Centers for Medicare and Medicaid Services.
