

Organizational Structure

Student Volunteer Coordinators work in conjunction with **Avera Sacred Heart Hospital Volunteer Services** to assess community needs and areas where medical student participation is needed. Working with the hospital's established volunteer program helps facilitate interaction with community organizations (and lessens student "cold calling" organizations).

Student Volunteer Coordinators pursue further logistical communications directly with **United Way of Yankton** in order to assess project needs and safety considerations. Project details are communicated to and must be approved by the relevant **Campus Dean and School of Medicine Administration**.

After approval, **Student Volunteer Coordinators** gather volunteers and materials (namely, masks) in order to participate in conjunction with **Community Volunteers** under the guidance of **United Way**.
