

Frequently Asked Questions

Q: What are common symptoms people experience when they have COVID?

A: Fever, cough, shortness of breath, loss of taste or smell are some of the common symptoms people who have COVID experience.

Q: Can I use hand sanitizer if I don't have access to soap and water?

A: YES! Use a hand sanitizer that has at 60% alcohol. Cover all surfaces of your hands and rub them together until they feel dry.

Q: Who should I tell if I start experiencing any symptoms?

A: You should alert your service providers (such as case managers, shelter staff, and other providers). These providers can assist you in understanding what to do next.

What is a virus?

A virus is a small infectious parasite. It needs a host, like a human, in order to replicate. They often cause harm to the host as they duplicate, which is why viruses can make people feel sick.

What is COVID?

COVID is a new disease, caused by a new coronavirus that has not previously been seen in humans. Most people with COVID have mild symptoms, but COVID can also cause severe illness and even death.

How can I protect yourself from COVID?

- KNOW HOW COVID SPREADS- the virus is thought to spread from person to person
- AVOID TOUCHING YOUR FACE with unwashed hands
- PUT 6 FEET DISTANCE between you and others
- COVER YOUR NOSE AND MOUTH with a cloth face cover when around others
- WASH YOUR HANDS WITH SOAP AND WATER for at least 20 seconds

KEYS FACTS YOU NEED TO KNOW!

What are the COVID vaccines?

There are currently THREE COVID vaccines available in the U.S: Moderna, Pfizer, Johnson-Johnson

All current COVID vaccines are safe and effective. The CDC (the Center for Disease Control) does not recommend one vaccine over the other. The most important decision is to get the COVID vaccine as soon as possible!

**For women ages 50 years and younger, it is advised to consult your service provider or a healthcare professional before receiving the Johnson and Johnson vaccine.
