

Table B-5.1: Total Enrollment by U.S. MD-Granting Medical School and Race/Ethnicity (Alone), 2021-2022

The table below displays the racial and ethnic characteristics (alone) of enrolled students in U.S. medical schools for 2021-2022. Enrollment includes the number of students in medical school, including students on a leave of absence, on October 31 of each year shown. Enrollment does not include students with graduated, dismissed, withdrawn, deceased, never enrolled, completed fifth pathway, did not complete fifth pathway, or degree revoked statuses. "Alone" indicates those students who selected only one race/ethnicity category. The "Multiple Race/Ethnicity" category includes those students who selected more than one race/ethnicity category. The "Multiple Race/Ethnicity" counts may include students who self-identified in a race/ethnicity category that the reader may wish to count as underrepresented in medicine (URiM), as well as students whom the reader may not wish to count as underrepresented—as a result, the data in this table cannot be used to calculate a unique count of individuals who identify as URiM. The AAMC definition of Underrepresented in Medicine found at <https://www.aamc.org/what-we-do/diversity-inclusion/underrepresented-in-medicine> is: "Underrepresented in medicine means those racial and ethnic populations that are underrepresented in the medical profession relative to their numbers in the general population." This AAMC definition allows for a variety of ways to conceptualize URiM, depending on whether (for example) one is looking at the national perspective, regional perspective, or local perspective. The "Non-U.S. Citizen and Non-Permanent Resident" category may include students with unknown citizenship. Please email datarequest@aamc.org if you need further assistance or have additional inquiries.
