

Summary of dashboards available to monitor the application process for students. Use this dashboard as an overview and to navigate to the specific dashboards for further analysis and detail drilldowns.

### 1. Print

Choose between This View to pull the entire report and Specific Sheets to pull specific items. Scaling, page size, and orientation can also be adjusted prior to download.

### 2. Student Activity | About This View

This view contains a summary of Key Performance Indicators (KPIs) that relate to students' activity in the application process. Hover over a KPI for more details.

### 3. Card Objects

An info icon is available within each card. Hover over the icon for the relevant help text associated with a card.

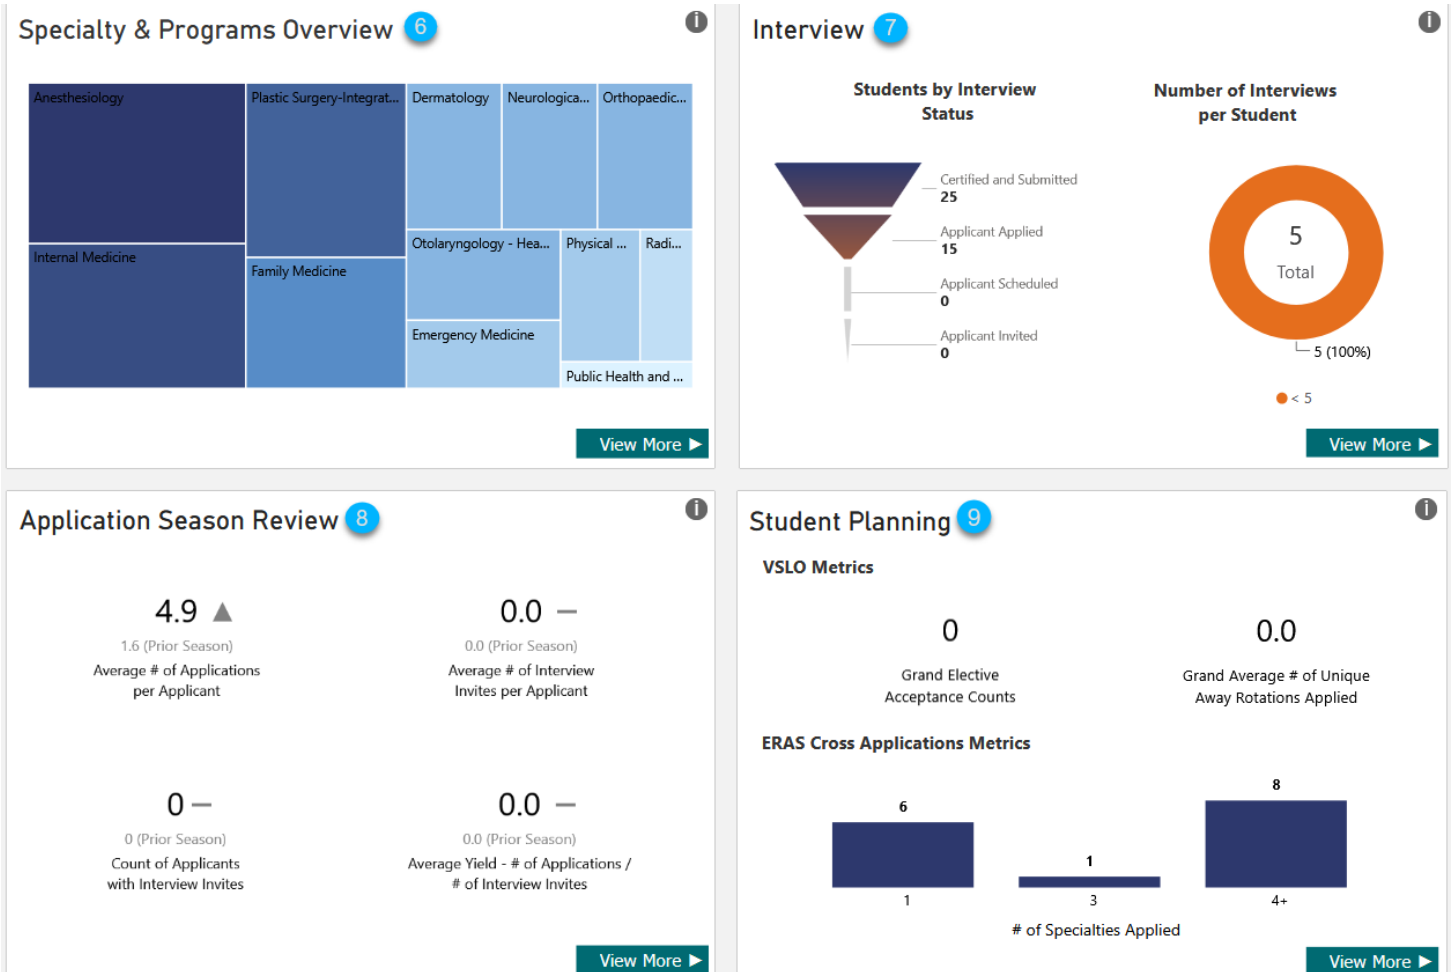

### 4. Card Navigation

Use this button to go to the corresponding dashboard for additional analysis.

### 5. Application Package Overview | About This View

This view shows two KPIs relevant to the application package process: the percent of students with less than three letters of recommendation and the percentage of students with less than ten experiences.

Summary of dashboards available to monitor the application process for students. Use this dashboard as an overview and to navigate to the specific dashboards for further analysis and detail drilldowns.

### 6. Specialty & Programs Overview | About This View

This tree map shows the number of students by specialty.

### 7. Interview | About This View

This card has a funnel chart to indicate the number of students by interview status and a pie chart to indicate the number of interviews per student.

### 8. Application Season Review

This view contains Key Performance Indicators (KPIs) that reflect the number of applications submitted and interview invites received up to this point in the season.

### 9. Student Planning

This view contains Key Performance Indicators (KPIs) for VSLO applications in the current season. The bar chart is for the cross-specialty applications of ERAS. This tile will lead to the Student Planning dashboard.

Please note, when viewing the dashboard in the current season, the visuals may appear blank until more data points become available through-out the season.
