

Specialty and program application trends of your students from the current season to year over year. This dashboard also contains national comparison data at an aggregate level comparing your school to national averages, including the ability to filter to the same type of accredited schools.

1. Print to PDF

Choose between This View to pull the entire report and Specific Sheets to pull specific items.

2. Global Dashboard Filters

There are a number of filters that can be adjusted using a drop-down menu to show only applicants to whom the filters apply. Multiple filters can be selected at the same time. Once selections are made, select the Apply button to filter the views.

3. Card Objects

Two objects are available within each card for additional options. Hover over the Info icon for the relevant help text associated with a card. Select the expander icon to make the card fill screen for additional viewing space.

4. Overview Card | About This View

This shows the percentage of students who applied to at least 1 program in the current season. The sparkline graph shows the number of students by season which is grouped by specialty, program, track, and track type. Hover over the dots on the sparkline graph to view more details.

Please note, after selecting a value users will be able to view details by selecting the “click here to view details” hyperlink on the bottom right of the chart.

5. Overview Card | Hierarchies and Sorting

When hovering over the column labels, use the + or - icons to expand or contract the hierarchy. This will update the number of columns in the sparkline graph and the values shown on the line. Additionally, when hovering over a column label, use the Sort icon to sort the view alphabetically or the drop-down to change the way Tableau will perform the sort.

Please note, sorting will apply according to the left-most grouping

6. My School vs National Card | About This View

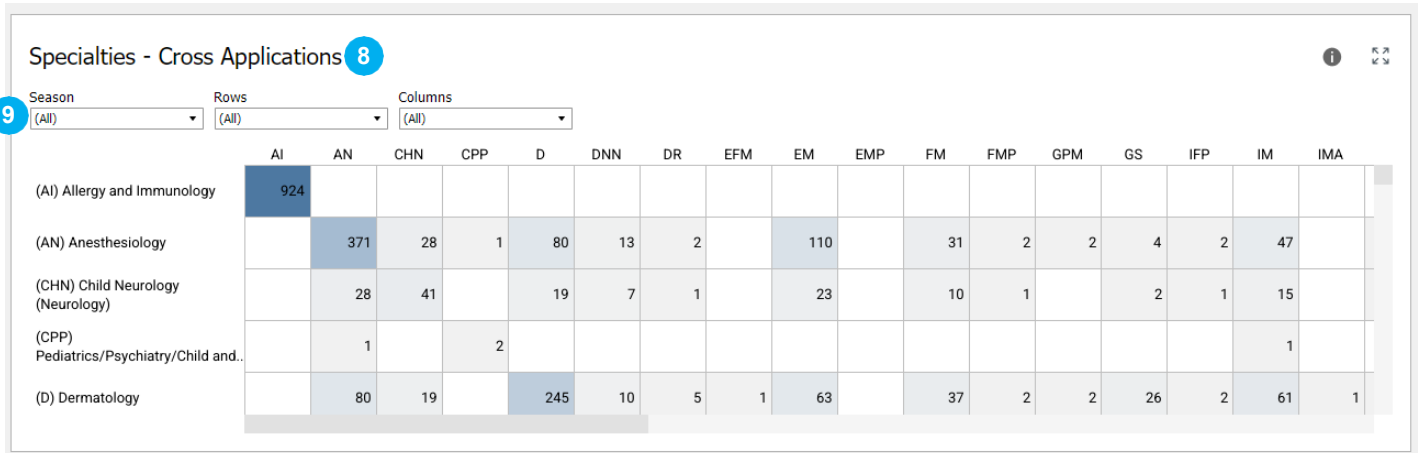

This shows a grouped bar chart which displays the percent of total students, applications, or average applications across specialties for my school versus the nation. The blue bar will represent the school’s percentages, and the grey bar will represent the national percentages. The view is sorted by the highest percentage for a specialty at the school descending.

7. My School vs National Card | Card-Based Filtering

In addition to the global dashboard filters listed on top of the dashboard, this view has card-based filters which can be applied for this view only.

Select from the Metric, Grad Type, or Season filters to update the card based on each selection.

Specialty and program application trends of your students from the current season to year over year. This dashboard also contains national comparison data at an aggregate level comparing your school to national averages, including the ability to filter to the same type of accredited schools.

8. Specialties - Cross Applications Card | About This View

This shows a chart which is a mapping of cross applications across specialties. On the rows shown along the left side of the view, the specialty code along with its description is displayed while along the columns across the top, only the specialty code is displayed. The values within the box represent the total applications within that specialty grouping. Additionally, the shade of blue within the chart represents the proportion of applications within that grouping when compared to the total across the chart.

Please note, after selecting a value users will be able to view details by selecting the “click here to view details” hyperlink on the bottom right of the chart.

9. Specialties - Cross Applications Card | Card-Based Filtering

In addition to the global dashboard filters listed on top of the dashboard, this view also has card-based filters which can be applied for this view only. Select from the Season, Rows, or Columns filters to update the card based on each selection

10. Applicant Details | About This View

The applicant details card will appear when a selection is made on either the *Overview* or *Specialties - Cross Applications* cards. The My School vs National card currently does not allow this functionality. Within the view, select a row to reveal a link which will take the user back to Dean’s Workstation to view the applicant’s profile.

11. Export Data

To export data, follow the following steps:

- When you are viewing the results, hover over the results.
- Click the horizontal ellipses (three dots) and click “Export”.
- Export your data in the format that suits your needs. If you have a lot of data, the number of rows you export might be limited depending on the file type you select. Select the X icon to return to the previous views in the dashboard.

Please note, when viewing the dashboard in the current season, the visuals may appear blank until more data points become available throughout the season.
