

**Table 9: Matriculants to U.S. Medical Schools  
By Selected Combinations of Sex and Race/Ethnicity, 2013**

The table below displays the self-identified race/ethnicity characteristics of female and male applicants to U.S. medical schools.\* In each row, the word "and" is used to separate the race/ethnicity response options that applicants selected; however, "Multiple Race/Ethnicity Not Listed Above" and "Unknown Race/Ethnicity" do not describe selectable response options. Please e-mail us at [datarequest@aamc.org](mailto:datarequest@aamc.org) if you need further assistance or have additional inquiries.

<b>Total Matriculants</b>	<b>9,467</b>	<b>10,588</b>	<b>20,055</b>

\* In 2013, the methodology for acquiring race/ethnicity information was updated. Rather than one question asking an applicant's Hispanic origin and a second question asking the applicant's race, the Hispanic origin and race response options are now listed together under a single question about how applicants self-identify. Applicants could select multiple response options.
