

**Table 8: Applicants to U.S. Medical Schools
by Selected Combinations of Race/Ethnicity and Sex, 2013-2014 and 2014-2015**

The table below displays the self-identified racial and ethnic characteristics of women and men applicants to U.S. medical schools.* In each row, a comma (,) is used to separate the race/ethnicity response options that applicants selected; however, "Multiple Race/Ethnicity Not Listed Above" and "Unknown Race/Ethnicity" do not describe selectable response options. Please email us at datarequest@aamc.org if you need further assistance or have additional inquiries.

Applicants	2013-2014			2014-2015

Unknown Race/Ethnicity	1,470	1,828	3,298	1,211	1,487	2,698
Non-U.S. Citizen and Non-Permanent Resident	867	909	1,776	943	958	1,901
Total Applicants	22,250	25,760	48,010	23,019	26,455	49,474

* In 2013, the methodology for acquiring race/ethnicity information was updated. Rather than one question asking an applicant's Hispanic origin and a second question asking the applicant's race, the Hispanic origin and race response options are now listed together under a single question about how applicants self-identify. Applicants could select multiple response options.

** The total includes four applicants in 2013 and six applicants in 2014 who declined to report gender.
