

**Table 9: Matriculants to U.S. Medical Schools
by Selected Combinations of Race/Ethnicity and Sex, 2013-2014 and 2014-2015**

The table below displays the self-identified racial and ethnic characteristics of women and men matriculants to U.S. medical schools.* In each row, a comma (,) is used to separate the race/ethnicity response options that matriculants selected; however, "Multiple Race/Ethnicity Not Listed Above" and "Unknown Race/Ethnicity" do not describe selectable response options. * In 2013, the methodology for acquiring race/ethnicity information was updated. Rather than one question asking a matriculant's Hispanic origin and a second question asking the matriculant's race, the Hispanic origin and race response options are now listed together under a single question about how a matriculant self-identify. Matriculants could select multiple response options.
