Proctored, Online exam

186 questions

75 minute maximum exam time

Individuals can retest twice per year, 4 times in their lifetime

Each registration allows score release to unlimited medical schools*

AAMC Fee Assistance Program recipients receive discounted registration pricing*

*Please refer to the PREview website for current pricing and AAMC Fee Assistance Program policies: aamc.org/preview

PREview Exam Design

The PREview exam is a situational judgment test that presents hypothetical scenarios based on real-life situtations in education, health care, and social or similar contexts.

Scenario 1

Your faculty instructor has assigned you the role of group leader for a discussion. Your course syllabus specifies that each student will receive a participation grade based on these discussions. During the discussion, you notice one student is starting to dominate the conversation. Other students seem to be frustrated that they cannot contribute.

RESPONSES

- 1. Impose a time limit on how long a person can talk at a given time.
- 2. Ask the student to allow others the opportunity to talk.
- 3. After the discussion, ask the student to limit their participation in future discussions.
- 4. Let the student know you appreciate their contributions but would like to hear from others as well.
- 5. Ask your faculty instructor to intervene the next time the student speaks up.

Very Ineffective (1)	Ineffective (2)	Effective (3)	Very Effective (4)
The response will cause additional problems or make the situation worse.	The response will not improve the situation or may cause a problem.	The response could help but will not significantly improve the situation.	The response will significantly improve the situation.

There are **186 total ratings** per exam.

PREview total scores are reported on **a scale of 1 to 9** with percentile ranks and confidence bands. Scores are comparable within and across testing years.
