What is academic medicine?

Academic medicine is where education, research, clinical care, and community collaborations are combined to provide the best possible outcomes. It touches the lives of Americans every day. The AAMC's vast membership network of 160 medical schools and nearly 500 academic health systems and teaching hospitals drives the patient care improvements and cutting-edge research breakthroughs that propel systemic change across the nation's health care system. To learn more about academic medicine's value to patients, families, and communities everywhere, from rural to urban, visit whatstartshere.aamc.org.

The AAMC and its members are dedicated to improving the health of people everywhere through medical education, health care, medical research, and community collaborations.

How does academic medicine benefit your state's economy?

Our members are [vital economic engines](#) in New York. In 2019, they added \$76.03 billion in value to the state's economy, generating 628,730 jobs. This added value was 4.06% of New York's GDP — or \$3,909 per resident. The average job supported by academic medicine in New York pays \$85,161.¹

Nearly 60% of extramural research funded by the National Institutes of Health (NIH) takes place at medical schools and teaching health systems and hospitals, where scientists, clinicians, and trainees work together to advance scientific breakthroughs that improve the lives of millions of Americans.² In New York, NIH research added \$3.12 billion to the state's economy and 27,647 jobs in 2019.¹

The AAMC (Association of American Medical Colleges) is a nonprofit association dedicated to improving the health of people everywhere through medical education, health care, biomedical research, and community collaborations. Its members are all 160 U.S. medical schools accredited by the [Liaison Committee on Medical Education](#); 12 accredited Canadian medical schools; nearly 500 academic health systems and teaching hospitals, including Department of Veterans Affairs medical centers; and more than 70 academic societies. Through these institutions and organizations, the AAMC leads and serves America's medical schools, academic health systems and teaching hospitals, and the millions of individuals across academic medicine, including more than 210,000 full-time faculty members, 99,000 medical students, 162,000 resident physicians, and 60,000 graduate students and postdoctoral researchers in the biomedical sciences. Through the Alliance of Academic Health Centers International, AAMC membership reaches more than 60 international academic health centers throughout five regional offices across the globe. Learn more at aamc.org.

² Statistics reflect an AAMC analysis of the 2021 NIH award data that was supplemented with data from the AAMC Faculty Roster and Council of Teaching Hospital records.

³ U.S. Physician Workforce Data Dashboard, as of April 1, 2025. American Medical Association Physician Professional Data last updated Dec. 31, 2023. U.S. Census Bureau 2023 American Community Survey data last updated Sept. 15, 2024.

⁴ U.S. Physician Workforce Data Dashboard, as of April 1, 2025. AAMC Student Records System data last updated Nov. 6, 2023. American Association of Colleges of Osteopathic Medicine enrollment data last updated Sept. 27, 2024.

⁵ These tables are based on the AAMC's analysis of FY2022 Medicare cost report data, Healthcare Cost Report Information System July 2024 release. Counts represent Full-Time Equivalent (FTE) residents. If FY2022 isn't available, FY2021 data is used. AAMC membership as of September 2024. Direct Graduate Medical Education (DGME) caps and counts include allopathic and osteopathic residents, but exclude dental and podiatric programs. Includes redistributed slots under Section 422, Section 5503, and Section 5506. DGME counts are unweighted FTEs. Teaching hospitals are defined as hospitals with DGME FTE count value that is greater than 0.
