

How to Update Screened Fields

Programs can screen information that they have considered to be sensitive information. At the beginning of each season screened data is reset to their defaults. Use this job aid to configure the data filter so screened application information is viewable.

In the 2025 ERAS season, PSUs and APSUs have the option to update 6 screened data fields, and ISUs and AISUs can update all 14 screened data fields. If an institution sets a restricted field for programs to be viewable, then the program can toggle between making these fields viewable or screened as needed. Program users must have a Super User role to configure screened information. Please contact the PSU or ISU to configure the screened data fields.

Note: Screened data fields will carry over into Thalamus.

Data fields for Institution Super User and Alternate Institution Super User roles:

- Basis for Work Authorization
- Birth Date
- Current Work Authorization
- Designated Pronouns
- Felony Conviction
- Gender
- Geographic Preference
- Hometown(s)
- Limiting Factors
- Misdemeanor Conviction
- Photograph
- Self Identification
- Visa Sponsorship Needed
- Visa Sponsorship Sought

Program Super User and Alternate Program Super Users can view all data fields but can only edit the following fields:

- Basis for Work Authorization
- Current Work Authorization
- Geographic Preference
- Hometown(s)
- Visa Sponsorship Needed
- Visa Sponsorship Sought

***You must have a Super User role to configure screened information**

Please contact your Program Super User(s) or Institution Super Users to configure the screened data fields. *

If data fields appear screened, it is because of Data Filters.
