

2024 ANNUAL DEVELOPMENT SURVEY REPORT

AUGUST 2025

2024 AAMC Development Survey Report

Reporting 2023-2024 Gift Year Data

August 2025

AAMC Washington, D.C.

Executive Summary

Overview

Each year, the AAMC conducts the Development Survey to measure the impact, costs, and staffing of fundraising at its member medical schools, academic health systems, and teaching hospitals. Maintained by the AAMC since 1999, these survey data are used by medical school deans, academic health system and teaching hospital CEOs, chief development officers, and other leaders at member institutions to assess integral components of a successful development program and to make effective decisions on the deployment of organizational resources. Through the compilation and analysis of annual data, the ongoing survey provides the opportunity for academic medicine organizations to identify philanthropic trends useful for development planning and management purposes.

Key findings from the 2024 survey representing the 2023-2024 gift year are presented in this report. At many institutions, the 2023-2024 gift year corresponds to the period of July 1, 2023 to June 30, 2024. The data from previous years may reflect new data that were received from respondents after the previous years' reports were released. In addition, for analysis purposes, institution ownership is based on AAMC reference tables, and any changes to the public or private status of an institution are made retroactive to prior years.

Access to institution-specific data is only available to the leadership of participating institutions and survey participants.

The figures in this report are not adjusted for inflation and represent unadjusted data from each year's survey. The average Consumer Price Index for All Urban Consumers (CPI-U) for the fiscal year ending June 30, 2024, increased by 3.3% over the average CPI-U for the fiscal year ending June 30, 2023.

Appendix A lists members of the AAMC Development Leadership Committee, which includes chief development/advancement officers from AAMC member institutions who provide guidance to AAMC staff on the survey and other fundraising support efforts. It also lists AAMC staff who lead the Development Survey program and representatives from GOBEL who support it. For additional information about the Development Survey or the AAMC's fundraising support efforts, please contact Jennifer L. Blanck, MEd, MSWB at (202) 862-6015 or iblanck@aamc.org. For more information about AAMC data, please visit the AAMC's Data & Reports website.

Methodology

The 2024 Development Survey was sent to 296 institutions in January 2025, and the survey closed in March 2025. Data were submitted by 130 institutions reporting development program activity for gift year 2023-2024. The 130 institutions in the report represent 65 private institutions and 65 public institutions (corresponding to 50% and 50% of the respondents, respectively). In this report, the data for 2023 include submissions from 127 institutions to the 2023 Development Survey. Survey data for participating institutions may not be comparable or generalizable to data for nonparticipants. See Appendix B for a list of all responding institutions included in the analysis.

A copy of the 2024 Development Survey, which includes a glossary of terms used in the survey, is available on the AAMC website under the "Explore this report" section.

The survey requires that participants classify their institution according to institution type. The following categories of institution type were established in the design of the first survey instrument in 1999 and remain the method of classifying participants:

¹ U.S. Bureau of Labor Statistics, U.S. Department of Labor. Databases, Tables & Calculators by Subject. https://data.bls.gov/timeseries/CUUR0000SA0. Accessed May 28, 2024.

- Medical school The development program is separate from the development program(s) of its primary teaching hospital(s). Of the 130 institutions in the report, 52 (or 40%) were medical schools.
- **Teaching hospital** The development program is separate from that of the medical school. Of the 130 institutions in the report, 22 (or 16.9%) were teaching hospitals.
- **Joint program** The development program is integrated and conducted jointly for the benefit of both the medical school and the teaching hospital(s). Of the 130 institutions in the report, 56 (or 43.1%) were joint programs.

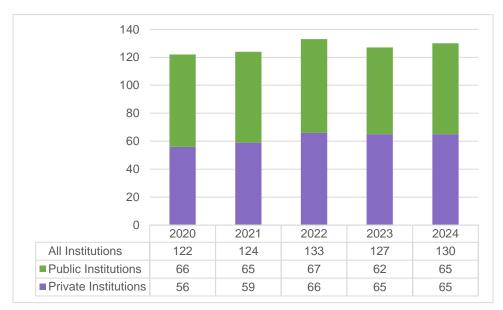

The term "all institutions" in this report indicates inclusion of data from all three classifications above. All institutions were eligible to answer each question, except when noted, though respondents were not required to submit a response for each question. As a result, the count may be different for each item.

The number of survey respondents are displayed in *Table 1(a)* by institution type, their status as a public or private institution, and their geographical region.

Table 1(a): Number of Survey Participants by Institution Type and Geographical Regions

Graph 1(b): Number of Participating Institutions

Selected Findings

- Mean philanthropic support increased in 2024 for participating private institutions and public institutions The mean total private support among all reporting institutions increased by 11.6%, from \$94.1 million in 2023 to \$105.1 million in 2024. The increase was seen across private institutions (from \$123.1 million in 2023 to \$141.5 million in 2024) and public institutions (from \$63.2 million in 2023 to \$66.9 million in 2024).
- Current operations gifts increased on average and continued to be the largest category of private support gifts For all reporting institutions, the mean of current operations gifts increased from \$68.4 million in 2023 to \$68.6 million in 2024. Unrestricted gifts accounted for 14.8% of total support dedicated to current operations, up from 14.3% in 2023.
- Individuals who are not alumni or staff of medical schools or teaching hospitals remained the largest segment of individual donors. Of the \$39.7 million mean total private support gifts by individuals received in 2024, \$31.6 million, or 79.6%, were contributed by domestic other individuals and another \$1.0 million, or 2.6%, from non-alumni, non-faculty international individuals.

The average gift sizes from domestic and international non-alumni, non-staff donors were \$7,752 and \$14,520, respectively, compared to the average gifts from medical school alumni of \$3,382.

- Among institution donors, mean total dollars increased by 4.1%, with increases in average total gifts from personal/family foundations (8.1%), donor advised funds (44.7%), and other private foundations (0.7%). There was a decrease in average total gifts from corporations by 1.9% and other institutions/organizations by 9.6%.
- The total number of **new gifts of \$1 million or more received by participating institutions** increased, with an increase in outright cash gifts (from 749 in 2023 to 802 in 2024) and an increase in new pledge commitments (from 1,239 to 1,393). Institutions that reported receiving new gifts and pledges of \$1 million or more received an average of 19 per institution in 2024, an increase from an average of 18 per institution in 2023.

In 2024, the median outright gift amount of \$5 million and above was \$8.5 million, a decrease from the 2023 median of \$8.6 million. The median pledge commitment amount of \$5 million and above also decreased – in 2024, the median was \$10.1 million, and in 2023, the median was \$12.4 million.

- Based on medians, public institution staff sizes grew by 2 FTE, and private institution staff sizes grew by 1 FTEs.
- Overall, median development costs increased, though program and personnel median
 expenses shrank by 5.9% and 3.2%, respectively. The median support received from
 departments or areas outside of the medical school, teaching hospital, or joint program
 development office budget increased by 24.1% (although fewer institutions reported costs
 covered by other budget resources than reported budgeted personnel and program costs).
- The median **cost per dollar raised (CPDR)** remained stable at \$0.14, and the average remained stable at \$0.15.
- Average return on investment (ROI), or the total dollars raised in relation to investment in personnel and operations, increased from \$11.56 in 2023 to \$13.48 in 2024. Public institutions had a lower average ROI than private institutions in 2024, with means of \$12.32 and \$14.64, respectively.

- Almost half of participating institutions were involved in a campaign 46% of the
 institutions surveyed reported being involved in a campaign in 2024, up from 45% in the 2023
 survey. For all institutions, the median campaign goal was \$1.0 billion, an increase from the \$750
 million median reported in 2023.
- There were 42 private and 32 public institutions that indicated they had access to conduct grateful patients/grateful patients' families fundraising efforts.

Of these 74 institutions, 64, or 86.5%, indicated having permission to screen inpatients and 71, or 95.9%, indicated having permission to screen outpatients.

- Median support for scholarships decreased and mean support for scholarships increased

 The overall median support for scholarships decreased from \$2.2 million in 2023 to \$2.0 million in 2024. Mean support for scholarships increased from \$3.5 million in 2023 to \$14.1 million in 2024.
- The philanthropic environment -

For many in philanthropy, fiscal year 2024 likely felt like the strongest year of growth since the pandemic. The economy seemed to have found its footing, and, with the markets performing well², it may have created a positive climate for charitable giving. However, donor caution and internal staffing challenges were still relevant. But the big story is one of continued resilience and strong financial support.

Giving figures from the 2024 AAMC Development Survey show some impressive growth. Across all reporting institutions, mean total private support jumped 11.6%, climbing from \$94.1 million in 2023 to \$105.1 million in 2024. This wasn't just isolated to one group, either. Private institutions saw their average support rise from \$123.1 million in 2023 to \$141.5 million in 2024, while public institutions reversed the slight dip seen from 2022 to 2023, growing from \$63.2 million in 2023 to \$66.9 million in 2024.

"Megagifts," such as 2024's landmark contributions to expanding student access and affordability through significant investments in scholarship funds, accounted for a portion of the total increase in giving. Even beyond those "megagifts," we saw more new gifts of \$1 million or more, with increases in the total number of both outright cash gifts (from 749 in 2023 to 802 in 2024) and new pledges (from 1,239 in 2023 to 1,393 in 2024).

Looking at the very top tier of gifts, things are a bit more complex. The median outright gift of \$5 million and above decreased slightly from \$8.6 million in 2023 to \$8.5 million in 2024. The median for new pledge commitments of \$5 million and above saw a bigger drop, from \$12.4 million in 2023 to \$10.1 million in 2024, signaling that despite the market, top donors may still be cautious in their decision-making.

On the inside, the staffing challenges of the post-pandemic era finally seemed to be easing. It is positive for the industry to see both public and private institutions grow their median staff size. And while staff size grew, it looks like organizations may be getting more efficient as median program and personnel expenses shrank from 2023 to 2024 by 5.9% and 3.2% respectively.

² Fidelity, 2024 stock market report. https://www.fidelity.com/learning-center/trading-investing/markets-sectors/stock-market-report. Accessed June 23, 2025

So, what was driving the philanthropic climate in fiscal year 2024?

- A strong economy and healthy stock market made a big difference. With the S&P 500 up over 20% for the second year in a row², it provided a massive boost to donor confidence and their ability to give, especially through appreciated stock.
- Donor Advised Funds (DAF) are more frequent than ever according to the 2024 AAMC
 Development Survey data. Average giving from DAFs increased by nearly 45%,
 demonstrating that fundraisers who have made DAFs a core part of their strategy may be
 seeing results.
- The strategic focus on hiring and retaining talent is paying off with a better return on investment. At the same time, generative AI is moving from a buzzword to a practical tool – helping teams with everything from writing grant proposals to segmenting donor lists, increasing productivity.³

But it wasn't all good news.

- The 2024 Fundraising Effectiveness Project found that donor retention has fallen for the fifth straight year.⁴ This is a clear sign that the sector is still grappling with how to keep donors engaged for the long haul.
- While past election years had a negligible effect on charitable giving, all signs indicate the
 most recent cycle broke this trend. Record-level fundraising for political campaigns has
 created significant competition for donor dollars, with the impact felt most acutely in the
 annual fund bracket of nonpolitical organizations.⁵ The effects of this heightened political
 giving are expected to continue influencing the philanthropic environment at least into
 fiscal year 2025.

While challenges like navigating the political climate and solving the donor retention puzzle remain, the sector's resilience and ability to adapt indicate it's in a good position for whatever comes next.

Graph 2(b): Mean Total Private Support by Gift Designation

(in millions of dollars)

The following graph displays total private support by gift designation for the last five years.

- Mean total private support for all institutions was up in 2024 from 2023, increasing 11.6% from \$94.1 million to \$105.1 million. Median total private support across all institutions also increased, from \$45.9 million in 2023 to \$49.0 million in 2024.
- For all institutions, gifts supporting Capital Purposes dropped on average, from \$10.2 million in 2023 to \$9.3 million in 2024.
- The mean for gifts to Current Operations grew by 0.4%, from \$68.4 million in 2023 to \$68.6 million in 2024. The mean for Endowment gifts increased, from \$18.0 million in 2023 to \$29.4 million in 2024.

Table 2(c): Unrestricted Gifts to Current Operations

The following table displays the proportion of gifts designated for current operations that were unrestricted, broken out by institution ownership and institution type.

Graph 3(b): Mean Total Private Support from Individuals

(in millions of dollars)

The following graph displays total private support by type of individual donor for the last five years.

- Non-alumni, non-staff/faculty, non-international individuals (designated as "Other Individuals") contributed a mean of \$31.6 million, or 79.6%, of all individual gifts received by all institutions in 2024; \$1.0 million, or 2.6%, of the total came from Non-Alumni, Non-Faculty International Individuals.
- The mean gifts from all individuals across all institutions were up, from \$29.9 million in 2023 to \$39.7 million in 2024.

Table 3(c): Total Private Support from Individuals Including Personal/Family Foundations and Donor Advised Funds

The following table displays total private support by type of individual donor, as well as personal/family foundations and donor advised funds, broken out by institution ownership and institution type.

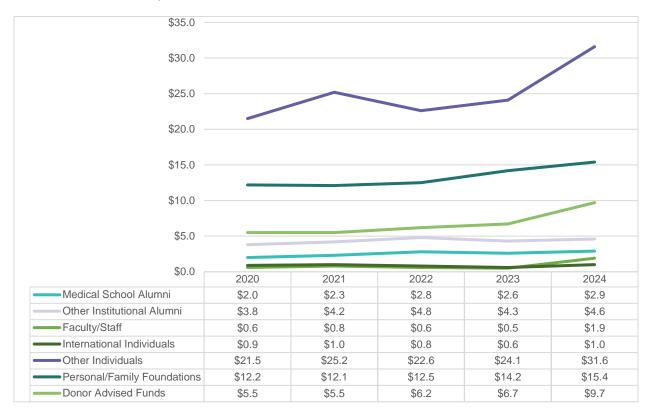

| | | Program Type | Medical School Alumni | Other Institutional Alumni | Medical Faculty/ Staff | Non-Alumni, Non-Faculty International Individuals | Other Individuals | Personal/ Family Foundations | Donor Advised Funds | All Individuals (With Inclusions) |

Graph 3(d): Mean Total Private Support from Individuals Including Personal/Family Foundations and Donor Advised Funds

(in millions of dollars)

The following graph displays total private support by type of individual donor, as well as personal/family foundations and donor advised funds, for the last five years.

- Many institutions consider giving from personal/family foundations and donor advised funds in the context of individual giving, as shown here. (*Table 5(c)* and *Graph 5(d)* exclude these sources from organizational giving, for parallel comparison.)
- The mean total private support from individuals including personal/family foundations and donor advised funds increased from \$49.1 million in 2023 to \$62 million in 2024, a 26.3% increase.
- The largest increase was seen in faculty/staff, which saw a nearly 300% increase from 2023, from \$486,499 to \$1.9 million.

Table 3(e): Mean Gift per Individual Donor

The following table displays mean gift per individual donor by type of individual donor, broken out by institution ownership and institution type. Mean gift per donor is calculated by dividing the individual dollars by the individual donors for each institution.

| | | Total | 6,791 | 80 | 319 | 314 | \$383,286 |

- Public institutions saw a slight decrease in the mean number of MD alumni donors making unrestricted gifts of \$1,000 and larger (from 56 in 2023 to 55 in 2024). A decrease was seen at private institutions (from 105 to 103), and the overall mean for all institutions was 80, down from 82 in 2023.
- Median total unrestricted gifts from MD alumni rose, from \$208,584 in 2023 to \$226,800 in 2024.

Institutional Giving

Graph 5(b): Mean Total Private Support from Institutions/Organizations

(in millions of dollars)

The following graph displays total private support by type of institution/organization donor for the last five years.

- On average, institutions and organizations contributed \$66.1 million in 2024.
- Average giving from donor advised funds increased 44.7%, from \$6.7 million in 2023 to \$9.7 million in 2024. This is still a small subset of overall giving, though the increase is worth watching.

Table 5(c): Total Private Support from Institutions/Organizations Excluding Personal/Family Foundations and Donor Advised Funds

The following table displays total private support by type of institution/organization donor, excluding personal/family foundations and donor advised funds, broken out by institution ownership and institution type.

Graph 5(d): Mean Total Private Support from Institutions/Organizations Excluding Personal/Family Foundations and Donor Advised Funds

(in millions of dollars)

The following table displays total private support by type of institution/organization donor, excluding personal/family foundations and donor advised funds, for the last five years.

• Many institutions exclude giving from personal/family foundations and donor advised funds when considering organizational giving, as shown here. (*Table 3(c)* and *Graph 3(d)* include these sources in individual giving, for parallel comparison.)

Table 5(e): Mean Gift per Institution/Organization Donor

The following table displays mean gift per institution/organization donor by type of institution/organization donor, broken out by institution ownership and institution type. Mean gift per donor is calculated by dividing the institution/organization dollars by the number of institution/organization donors for each institution.

2024 AAMC Development Survey Report

- The mean gift sizes from corporations to private and public institutions in 2023 were \$70,448 and \$53,905, respectively. In 2024, these gifts to private and public institutions increased to \$74,238 and \$218,057, respectively. The increase for public institutions was in part driven by a singular institution that received a large gift from a corporation in 2024. The overall mean across all institutions increased from \$62,513 to \$146,147.
- Mean gift sizes from personal/family foundations in 2023 were \$132,996 for private institutions, \$194,437 for public institutions, and \$161,879 overall. In 2024, the mean gift sizes from personal/family foundations were \$168,202 for private institutions, \$149,946 for public institutions, and \$159,312 across all institutions.

\$1 Million+ Gifts

Table 6(a): Total Number of \$1 Million+ Outright Gifts

Graph 6(d): \$1M+ New Gifts and Pledges

The following graph displays the total number of new outright gifts and new binding pledge commitments over one million dollars received by participating institutions during the previous five gift years, broken out by institution ownership. Please note that the number of participating institutions may vary from year to year.

- For participating institutions, a total of 2,195 new gifts and pledges of \$1 million and above were reported in 2024, an increase from 1,988 in 2023.
- Within that total number, outright gifts of \$1 million and above saw an increase, from 749 in 2023 to 802 in 2024. New pledge commitments of \$1 million and above increased from 1,239 in 2023 to 1,393 in 2024.
- There were 115 institutions that reported receiving new gifts and pledges of \$1 million and above in 2024. Among those, the average number of new gifts and pledges of \$1 million and above was 19 per institution, an increase from 18 in 2023.

Development Staff – FTEs

Tables 7 and 8 display data for staff sizes represented in terms of fundraising professionals, other professionals, and support staff. The information was reported and is presented in terms of full-time equivalency (FTE). Institutions were asked to include all FTEs budgeted for the fiscal year, even if positions were vacant. Institutions that reported no FTEs in a given category were not included in the figures for that category. The mean and median values in the total columns represent the mean and median of each participating institution's total. They do not represent the sum of the subcategory means and medians.

| | | Public Subtotal | 26 | 7 | 32 |
| | | | | | |

- The 2024 survey data show no change in total development staff for all institutions with a median of 36 FTEs, the same as in 2023.
- Professional fundraising staffing levels increased to a median of 20 FTEs in 2024, up from 19 in 2023. The 2024 median for other professional staff was 14 FTEs, up from 12 FTEs in 2023.
- Consistent with previous years' reporting, the size of professional staff for 2024 reported by
 private institutions is larger than that of public institutions. The median and mean of total
 professional staff for public institutions were 19 and 26 FTEs, respectively, compared with a
 median and mean of 44 and 59 FTEs for private institutions.

| s | | Private Subtotal | \$11,077,897 | \$3,832,784 | \$2,669,566 | \$15,433,928 |
| Means | | Joint Program | \$6,634,999 | \$1,920,074 | \$2,065,881 | \$9,267,446 |
| 2 | Dublic | Medical School | \$1,571,883 | \$299,870 | \$706,059 | \$2,158,430 |
| | Public | Teaching Hospital | \$9,067,465 | \$5,253,088 | \$1,133,572 | \$14,603,946 |
| | | Public Subtotal | \$4,620,378 | \$1,492,706 | \$1,343,593 | \$6,571,249 |
| | | Total | \$7,876,734 | \$2,683,272 | \$1,836,097 | \$11,040,463 |

2024 AAMC Development Survey Report

- The mean total development costs for all institutions increased from \$10.8 million in 2023 to \$11.0 million in 2024. The median also increased, from \$5.9 million in 2023 to \$6.1 million in 2024.
- For public institutions, mean total development costs increased from \$5.8 million in 2023 to \$6.6 million in 2024. At private institutions, mean total development costs remained stable at \$15.4 million in 2024.
- Private institutions continued to have higher total development costs in 2024, more than two times higher than public total development costs on average.
- Personnel costs remained the majority of total development costs reported. For all institutions, the mean personnel costs in 2024 represented 74% of the mean total development costs (not including "Costs Covered by Other Budget Resources").

Cost Per Dollar Raised (CPDR)

Table 10: Cost of Fundraising

The following table displays cost as a function of total private support, or the cost per dollar raised (CPDR), broken out by institution ownership and institution type. CPDR is calculated by dividing the total development costs by the total dollars raised for each institution, then calculating the median and mean. Institutions with a CPDR of greater than \$0.50 were excluded from the analysis.

| | | Program Type | Total Development Costs | Total Private Support | Cost Per Dollar Raised |
|------------------------|---------|-------------------|-------------------------------|--------------------------|---------------------------|
| | | | | | |
| | | Joint Program | 24 | 24 | 24 |
| _ | Private | Medical School | 16 | 16 | 16 |

| | | Total | \$6,573,680 | \$54,059,481 | \$0.14 |
| | | | | | |
| | | Joint Program | \$17,889,237 | \$183,295,608 | \$0.17 |
| | Private | Medical School | \$4,970,491 | \$100,978,612 | \$0.10 |
| | Filvate | Teaching Hospital | \$24,152,204 | \$162,840,936 | \$0.18 |
| Means | | Private Subtotal | \$15,987,586 | \$153,932,274 | \$0.15 |
| | | Joint Program | \$9,249,886 | \$109,789,267 | \$0.15 |
| 2 | Public | Medical School | \$2,158,430 | \$22,335,506 | \$0.16 |
| | rubiic | Teaching Hospital | \$18,859,351 | \$94,992,146 | \$0.18 |
| | | Public Subtotal | \$6,598,850 | \$69,954,707 | \$0.15 |
| | | Total | \$11,293,218 | \$111,943,490 | \$0.15 |

2024 AAMC Development Survey Report

- Typically, the cost of fundraising includes costs directly related to fundraising activity and support of fundraising.
- For all institutions, both the median and mean CPDR remained stable at \$0.14 and \$0.15 in 2024, respectively.
- For reference, over the years this survey has reported a range of median CPDR, from \$0.06 in 1999 (a relatively low figure, due primarily to the small pool of institutions participating in the inaugural year of the project) to a high of \$0.14 in 2009, 2014, 2016, 2023, and this year. As a reminder, the figures in this report are not adjusted for inflation and represent unadjusted data from each year's survey.
- By institution type, the costs of fundraising were highest among teaching hospitals in 2024, with a median CPDR of \$0.17. Joint Programs reported a median CPDR of \$0.12, and medical schools reported a median CPDR of \$0.09.

Return on Investment

Table 11: Dollars Raised per Total Development Costs

The following table displays the return on investment (ROI), broken out by institution ownership and institution type. ROI is calculated by dividing the total dollars raised by the total development costs for each institution, then calculating the median and mean. Institutions with a ROI of less than \$2.00 were excluded from the analysis.

| | Joint Programs | Medical Schools | Teaching Hospitals | All |
|-----------------------------------------------|-------------------|--------------------|-----------------------|---------|
| | | | | |
| Number of Private Institutions Reporting Data | 24 | 16 | 16 | 56 |
| Number of Public Institutions Reporting Data | 28 | 25 | 3 | 56 |
| Number of All Institutions Reporting Data | 52 | 41 | 19 | 112 |
| | | | | |
| Private Median | \$7.34 | \$16.24 | \$5.84 | \$6.98 |
| Public Median | \$9.84 | \$7.43 | \$6.06 | \$8.08 |
| All Median | \$8.63 | \$11.38 | \$5.93 | \$7.23 |
| | | | | |
| Private Mean | \$10.80 | \$29.08 | \$5.97 | \$14.64 |
| Public Mean | \$12.57 | \$12.84 | \$5.76 | \$12.32 |
| All Mean | \$11.75 | \$19.18 | \$5.93 | \$13.48 |

- ROI reflects the total dollars raised (Total Private Support) in relation to investment in personnel
 and operations (Total Development Costs). ROI is the inverse of cost per dollar raised (CPDR),
 and is another method often used for measuring institutional fundraising performance and
 assessing development program effectiveness.
- Among all institutions in 2024, the median dollar return was \$7.23, with public institutions garnering a higher return at a median of \$8.08 than private institutions with a median of \$6.98.
 The median ROI for public institutions decreased from \$9.62 in 2023, and the median ROI for private institutions remained stable.
- Consistent with previous years, medical schools reported the highest returns with a median of \$11.38, followed by joint programs at \$8.63 and teaching hospitals at \$5.93.

Campaign Activity

Table 12(a): Campaign Length and Goal – Medical Schools

The following table displays the campaign length and dollar goal for medical schools that reported being in a campaign for fiscal year 2023-2024, broken out by institution ownership.

| | Campaign Length | Campaign Goal |
|-----------------------------------------------|-----------------|-----------------|
| | | |
| Number of Private Institutions Reporting Data | 10 | 11 |
| Number of Public Institutions Reporting Data | 6 | 8 |
| Number of All Institutions Reporting Data | 16 | 19 |
| | | |
| Private Median | 9 years | \$500,000,000 |
| Public Median | 10 years | \$750,000,000 |
| All Median | 10 years | \$500,000,000 |
| | | |
| Private Mean | 9 years | \$1,407,272,728 |
| Public Mean | 10 years | \$1,300,625,000 |
| All Mean | 9 years | \$1,362,368,421 |

Table 12(b): Campaign Length and Goal – Teaching Hospitals

The following table displays the campaign length and dollar goal for teaching hospitals that reported being in a campaign for fiscal year 2023-2024, broken out by institution ownership.

| | Campaign Length | Campaign Goal |
|-----------------------------------------------|-----------------|-----------------|
| | | |
| Number of Private Institutions Reporting Data | 6 | 6 |
| Number of Public Institutions Reporting Data | 2 | 2 |
| Number of All Institutions Reporting Data | 8 | 8 |
| | | |
| Private Median | 9 years | \$2,000,000,000 |
| Public Median | 6 years | \$275,000,000 |
| All Median | 8 years | \$1,600,000,000 |
| | | |
| Private Mean | 10 years | \$2,533,333,333 |
| Public Mean | 6 years | \$275,000,000 |
| All Mean | 9 years | \$1,968,750,000 |

Table 12(c): Campaign Length and Goal – Joint Programs

The following table displays the campaign length and dollar goal for joint programs that reported being in a campaign for fiscal year 2023-2024, broken out by institution ownership.

| | Campaign Length | | |
|-----------------------------------------------|-----------------|-----------------|--|
| | | | |
| Number of Private Institutions Reporting Data | 12 14 | | |
| Number of Public Institutions Reporting Data | 13 13 | | |
| Number of All Institutions Reporting Data | 25 | 27 | |
| | | | |
| Private Median | 8 years | \$1,450,000,000 | |
| Public Median | 8 years | \$1,600,000,000 | |
| All Median | 8 years | \$1,500,000,000 | |
| | | | |
| Private Mean | 8 years | \$1,567,857,143 | |
| Public Mean | 9 years | \$1,730,000,000 | |
| All Mean | 9 years | \$1,645,925,926 | |

Table 12(d): Campaign Length and Goal - All Institutions

The following table displays the campaign length and dollar goal for institutions that reported being in a campaign for fiscal year 2023-2024, broken out by institution ownership.

| | Campaign Length | Campaign Goal | |
|-----------------------------------------------|-----------------------|-----------------|--|
| | | | |
| Number of Private Institutions Reporting Data | 28 | 31 | |
| Number of Public Institutions Reporting Data | 21 | 23 | |
| Number of All Institutions Reporting Data | 49 | 54 | |
| | | | |
| Private Median | 9 years | \$1,200,000,000 | |
| Public Median | 9 years | \$1,000,000,000 | |
| All Median | 9 years | \$1,000,000,000 | |
| | | | |
| Private Mean | 9 years | \$1,697,741,936 | |
| Public Mean | 9 years \$1,454,130,4 | | |
| All Mean | 9 years | \$1,593,981,482 | |

2024 AAMC Development Survey Report

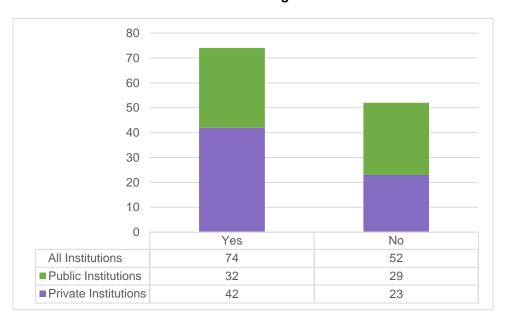

- Of the 130 participating institutions, 59, or 46%, reported being involved in a campaign in 2024.
- For all medical schools, the median campaign length was 10 years. The median campaign goal was \$500 million, the same as the 2023 median of \$500 million.
- For all teaching hospitals, the median campaign length was 8 years, and the median campaign goal was \$1.6 billion, higher than the \$1.0 billion median reported in 2023.
- For all joint programs, the median campaign length was 8 years, and the median campaign goal was \$1.5 billion, higher than the \$1.2 billion median reported in 2023.
- For all institutions, the median campaign length was 9 years, and the median campaign goal was \$1.0 billion, an increase from the \$750 million median reported in 2023.

Grateful Patient Programs

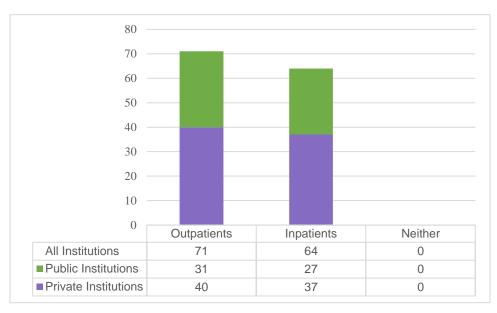

The following graphs display data summarizing responses to questions about grateful patient fundraising programs.

Graph 13(a): Does your institution have access to conduct grateful patients/grateful patients' families fundraising efforts?

- There were 42 private and 32 public institutions that indicated that they had access to conduct grateful patients/grateful patients' families fundraising efforts.
- Of the 52 participating medical schools, 12 had access to conduct grateful patient/grateful patients' families fundraising.

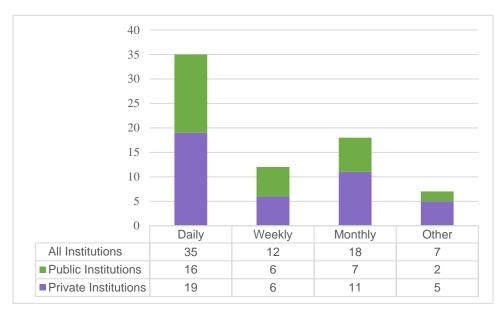

Graph 13(b): Does your institution have permission to screen patients?

- Of the 32 public institutions that had permission to conduct grateful patient fundraising, 27 indicated having permission to screen inpatients and 31 indicated having permission to screen outpatients.
- Of the 42 private institutions that had permission to conduct grateful patient fundraising, 37
 indicated having permission to screen inpatients and 40 indicated having permission to screen
 outpatients.

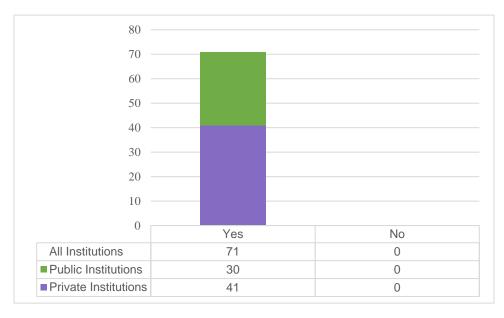

Graph 13(c): How often does your institution screen new patients?

- Of the 72 institutions that conducted regular screenings, 35 conducted such screenings daily, and 30 conducted weekly or monthly screenings.
- The number of institutions reporting monthly screenings increased from 17 in 2023 to 18 in 2024. The number of institutions reporting weekly screenings remained the same.

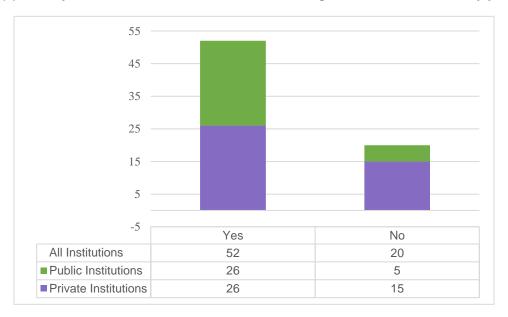

Graph 13(d): Does your institution have development officers partner with faculty to secure referrals and engage prospects or donors?

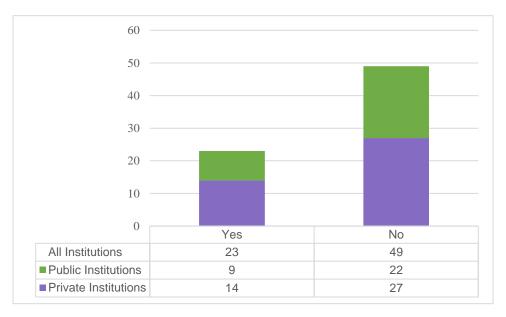

Development officers partnered with faculty at all of the 71 institutions.

Graph 13(e): Does your institution track the number of caregiver referrals received by your office?

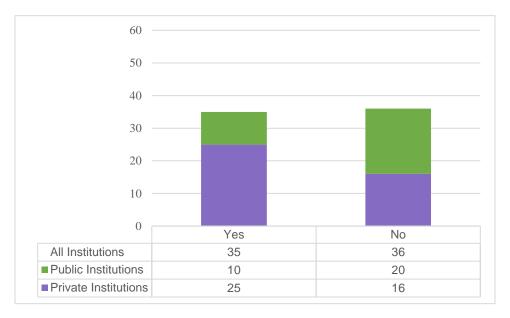

Graph 13(f): Does your institution track caregiver referrals as a KPI for each development officer?

• Of the responding institutions, 52 tracked the number of caregiver referrals they received, and 23 have made this metric a key performance indicator (KPI) for their gift officers.

Graph 13(g): Does your institution allow development officers to visit with patients or patients' families while the patient is in the hospital?

• Of the 71 responding institutions, 35 allow development officers to visit with patients/families while the patient was in hospital.

Scholarships

Table 14: Support for Scholarships

The following table displays scholarship funding (not including loan programs) raised for MD and MD/PhD students at participating institutions, broken out by institution ownership and institution type.

| | Joint Programs | Medical Schools | Teaching Hospitals | All |
|-----------------------------------------------|-------------------|--------------------|-----------------------|--------------|
| | | | | |
| Number of Private Institutions Reporting Data | 24 | 21 | 0 | 45 |
| Number of Public Institutions Reporting Data | 28 | 26 | 0 | 54 |
| Number of All Institutions Reporting Data | 52 | 47 | 0 | 99 |
| | | | | |
| Private Median | \$2,206,058 | \$4,204,671 | N/A | \$2,570,233 |
| Public Median | \$2,290,490 | \$1,116,082 | N/A | \$1,501,074 |
| All Median | \$2,206,058 | \$1,736,900 | N/A | \$1,985,938 |
| | | | | |
| Private Mean | \$45,330,708 | \$6,813,684 | N/A | \$27,356,097 |
| Public Mean | \$4,239,517 | \$1,623,517 | N/A | \$2,979,961 |
| All Mean | \$23,204,682 | \$3,942,528 | N/A | \$14,060,023 |

- Median support for scholarships at all institutions decreased from \$2.2 million in 2023 to \$2.0 million in 2024. Mean support for scholarships at all institutions increased from \$3.5 million in 2023 to \$14.1 million in 2024. The increase in mean was in part driven by a singular institution that received a large gift for scholarships in 2024. Excluding this institution, the mean support for scholarships still saw an increase to \$3.9 million in 2024.
- Support for scholarships decreased for private institutions to \$2.6 million in 2024 from a 2023 median of \$3.4 million; public institutions saw a decrease in median to \$1.5 million from \$1.6 million.
