

Table A-14.2: Race/Ethnicity Responses (Alone and In Combination) of Acceptees to U.S. MD-Granting Medical Schools, 2019-2020 through 2023-2024

The table below displays the self-identified racial and ethnic characteristics of acceptees to U.S. MD-granting medical schools from 2019-2020 through 2023-2024. "Alone" indicates those who selected only one race/ethnicity response. "In Combination" indicates those who selected more than one race/ethnicity response. Also, the sum of the acceptees in the underrepresented categories may not add to the Unduplicated Total URiM Acceptees since acceptees could designate multiple underrepresented categories. The AAMC definition of Underrepresented in Medicine found at <https://www.aamc.org/what-we-do/diversity-inclusion/underrepresented-in-medicine> is: "Underrepresented in medicine means those racial and ethnic populations that are underrepresented in the medical profession relative to their numbers in the general population." This AAMC definition allows for a variety of ways to conceptualize URiM, depending on whether (for example) one is looking at the national perspective, regional perspective, or local perspective. For the purposes of this particular FACTS table, a URiM acceptee is any U.S. citizen or permanent resident who self-identified as one or more of the following race/ethnicity categories (alone or in combination with any other race/ethnicity category): American Indian or Alaska Native; Black or African American; Hispanic, Latino, or of Spanish Origin; or Native Hawaiian or Other Pacific Islander.
