Note: Applicants, acceptees, and matriculants who declined to report gender are not reflected. Therefore, the sum of the Women, Men, and Another Gender Identity counts may not equal the total.

In 2016-2017, the methodology for calculating first-time applicants was updated from any applicant who had not applied in the past nine years to any applicant who had not applied since 1973, the earliest year for which there is AMCAS data. The counts for all years in this table reflect the new methodology. Due to the updated methodology, tables published prior to 2016 may display different first-time applicant counts.

In 2023-2024, the "Another Gender Identity" response option was added to the gender question on the AMCAS application.

Each academic year includes applicants and matriculants that applied to enter medical school in the fall of the given year. For example, academic year 2023-2024 represents the applicants and matriculants that applied to enter medical school during the 2023 application cycle.
