

**Table B-6.2: Total Graduates by U.S. MD-Granting Medical School and Race/Ethnicity (Alone or In Combination), 2022-2023**

The table below displays the race and ethnicity self-identification (alone or in combination) of graduates of U.S. medical schools for 2022-2023. Alone or in combination indicates those graduates who self-identify in a race/ethnicity category alone or in combination with another race/ethnicity category. The sum of the race/ethnicity categories may not add to the total number of graduates since a graduate could designate multiple race/ethnicity categories. Also, the sum of the graduates in the underrepresented categories may not add to the Unduplicated Total URiM Graduates since graduates could designate multiple underrepresented categories. The AAMC definition of Underrepresented in Medicine found at <https://www.aamc.org/what-we-do/diversity-inclusion/underrepresented-in-medicine> is: "Underrepresented in medicine means those racial and ethnic populations that are underrepresented in the medical profession relative to their numbers in the general population." This AAMC definition allows for a variety of ways to conceptualize URiM, depending on whether (for example) one is looking at the national perspective, regional perspective, or local perspective. For the purposes of this particular FACTS table, a URiM graduate is any U.S. citizen or permanent resident who self-identified as one or more of the following race/ethnicity categories (alone or in combination with any other race/ethnicity category): American Indian or Alaska Native; Black or African American; Hispanic, Latino, or of Spanish Origin; or Native Hawaiian or Other Pacific Islander. In this display, the race/ethnicity categories are reported only for U.S. citizens and permanent residents. The "Non-U.S. Citizen and Non-Permanent Resident" category may include graduates with unknown citizenship.
