Sessions of Interest: AAMC Group on Business Affairs (GBA)

The AAMC has assembled an extraordinary lineup of speakers and an engaging program. Highlights include:

- **Voices of Medicine and Society Series**.
- More than 140 education sessions.
- 80 networking events and receptions.
- More than 100 poster presentations.
- An exhibit hall with more than 120 exhibits.
- An opportunity to facilitate one of 150 focused discussions over lunch.
- Daily wellness events.

Each day, we’ll start with a plenary session. Highlighted below are some of the sessions that may be of particular interest to you as a GBA member, in addition to the plenary and thought leader sessions. These are just a sample of sessions; almost all sessions are open to all attendees. There will likely be other sessions during each time block that will be of greater interest. By gaining a broader understanding of academic medicine, we can break down silos and partner more effectively with others at our institutions.

**Friday, November 8**
- Welcome to Phoenix Reception

**Saturday, November 9**
