

New Resource Available – Orientation to the AAMC Curriculum Inventory (CI)

Understanding curriculum mapping, and specifically the AAMC Curriculum Inventory (CI) can include a steep learning curve. Explaining the AAMC CI to those with less direct roles or lines of sight into your school's curriculum mapping practices, like your teaching faculty and curriculum committee members, can be even more challenging. To hopefully help you with sharing the AAMC CI with your faculty and staff, the [Introduction to the AAMC CI](#) presentation with audio recording has been made available on our website under [Resources to Establish Your CI](#). This is our first edition of an AAMC CI orientation, and we'd appreciate any feedback at ci@aamc.org.

AAMC Curriculum Inventory at Learn Serve Lead 2019

There were a number of opportunities to learn about and discuss the AAMC CI at this year's Learn Serve Lead annual meeting, including open office hours, a presentation, and a workshop. If you have any feedback or suggestions for AAMC CI future content, please let us know at ci@aamc.org. Thank you to our CI Committee members for helping to create and present these sessions!

- Carolyn Dufault, Washington University
- Samara Ginzburg, Zucker School of Medicine at Hofstra Northwell
- Nancy Hueppchen, Johns Hopkins University
- Jennifer Koestler, New York Medical College
- Kevin Krane, Tulane University
- Brian Mavis, Michigan State University
- Vicki Park, University of Tennessee Health Science Center
- Julie Youm, University of California, Irvine

Special thanks to our AAMC staff for supporting these sessions, especially Walter Fitz-William, Linh Le, and John Nash.

As always, if you have any questions, comments, or suggestions please reach out to ci@aamc.org.

Onward!

Angela D. Blood

Director, Curricular Resources
