PROPOSED CHANGE IN OSR RULES & REGULATIONS

ACTION: The Board advised the OSR that deletion of the proposed revision making a Chairperson-Elect who failed to receive a vote of confidence of Administrative Board of the OSR ineligible for election to the Chairpersonship was acceptable to the COD. The provision calling for a vote of confidence should be reframed in terms which would make the Chairperson-Elect automatically succeed to the Chairpersonship unless he/she had received a vote of no confidence.

The Board saw substantial problem with the suggestion that a recall provision be included: a) because it was non-parallel with the Association Bylaws and the Rules and Regulations of the other Councils; and b) because it would seem to provide a stimulus to discontinuity in the leadership of the OSR.
MEDICAL SCHOOL ADMISSIONS--A PROPOSED POLICY STATEMENT

STANDARD ORDER OF PROCEDURE FOR APPROVAL OF NEW SPECIALTIES

ACTION: The Executive Council approved the report of a CCME/LCGME/LCSB committee establishing the procedure for approving
new specialties. Since this procedure would require the approval of the Coordinating Council on Medical Education, the Executive Council indicated its belief that any such CCME action would be considered a major policy action requiring the approval of the parent organizations.

REPORT OF THE COMMITTEE ON GOVERNANCE & STRUCTURE

ACTION: The Executive Council approved two recommendations of the Committee on Governance and Structure relating to the organization of minority affairs representatives and continuing education representatives within the Group on Student Affairs and the Group on Medical Education. The Executive Council referred these approved recommendations to the involved Groups, asking them to develop the mechanisms to implement these recommendations.

REPORT OF JOINT CCME/LCGME COMMITTEE ON FINANCING GRADUATE MEDICAL EDUCATION

ACTION: The Board recommended that the Executive Council approve the recommendations of the Joint CCME/LCGME Committee but urged, in addition, that the cover letter forwarding the AAMC response note that there are alternative forms of financing graduate medical education directly as an acknowledged educational expense, presently in existence in some cases and proposed in others. Inasmuch as these are also valid approaches, they should not be undercut by any position taken by the CCME and/or LCGME.

REPORT OF THE COMMITTEE ON GOVERNANCE AND STRUCTURE

ACTION: The Board endorsed the two recommendations of the Committee concerned with the appropriate organizational locus of the minority affairs membership and the directors of
continuing medical education within the AAMC structure. The Board advised that it did not appear timely to formally address the specific issues on which the committee sought guidance.

OSR REPRESENTATION ON EXECUTIVE COUNCIL

ACTION: The Board defeated a motion to endorse the OSR preferred alternative for providing for a second voting member of the Executive Council—that the immediate past chairperson be seated ex officio with vote.

The Board recommended that the Executive Council approve the following plan to increase by one, OSR representation on the Executive Council:

The OSR would elect a Chairperson-Elect who would automatically (unless recalled by a vote of the OSR membership or Board) assume the office of Chairperson in the second year. Both the Chairperson and Chairperson-Elect would be voting members of the Executive Council.

In consideration of additional information presented on the second day of the meeting, the CAS Administrative Board voted unanimously to modify its previous action, in which it approved the AAMC response to the IOM report, to take into account the following considerations:

1) The AAMC is opposed to double billing.

2) The AAMC supports identifying and making explicit what the supervisory (Part A) positions are and what they do and in cases in which there is any doubt, either Part A or Part B must be waived.

REPORT OF THE PRESIDENT'S BIOMEDICAL RESEARCH PANEL

ACTION: The CAS Administrative Board unanimously approved the AAMC recommendations as set forth in the Executive Council Agenda (pages 67-74) with modification on pages 67, 72, 73, and 74. Page 73, Point # 3, change "trials" to "research;" Page 73, Point # 4 (b) delete the word "widespread" and insert at the end of that line "carefully designed and evaluated" so that the phrase following (b) would read "for dissemination through carefully designed and evaluated demonstration projects."

ROLE AND FUTURE ACTIVITY OF THE COMMITTEE ON GOVERNANCE AND STRUCTURE

ACTION: The CAS Administrative Board unanimously opposed a major review of the programs and mission of the AAMC at this time although it felt that the concern of the committee that the AAMC better represent the chief executive officer of the academic medical center who was not the dean was an important and appropriate issue to be addressed by the Council of Deans.

It was suggested that the Association's remarks take into consideration the fact that the data are not final and also that there is some question as to whether the breakdown by specialty is representative of the practitioners who actually serve as entry points to the health care system.

Pages 106-107

The Administrative Board agreed that some institutions may appropriately not be able to implement the IOM recommendations that mixed and geographic settings for different payment methods within a hospital be eliminated. Because there are some institutions that, due to traditional characteristics, utilize this method without differentiating between levels of care, the Board recommended that the AAMC comments call for an exception to the elimination of all mixed settings.

Page 107

The Board requested that irrespective of which payment methods are eventually implemented, it is of particular importance that there be adequate time to make the necessary changes prior to initiation of a new or revised reimbursement system.

"That on an interim basis special programs of graduate medical education be organized for immigrant physicians who have failed to qualify for approved residencies and who have immigrated to this country prior to January 1, 1976. (This time restriction does not apply to physicians entering the U.S. with Seventh Preference visas (refugees).) Immigrant physicians applying to such programs must present credentials acceptable to the sponsoring agencies; the purposes of these special programs are:

a. to provide a proper orientation to our health care system, our culture and the English language, and

b. to identify and overcome those education deficits that handicap FMG's in achieving their full potential as physicians in the U.S. health care system; and"

With regard to Item C-6, the CAS Administrative Board supported the Alternate Wording (From AAMC Policy):

"That the special programs currently offered by some medical schools commonly called The Fifth Pathway Program should be phased out. Qualified U.S. citizens who have studied medicine abroad should be provided the same educational opportunities and recognition as their colleagues who enter U.S. medical schools directly. If resources can be made available, qualified students should be selected by the faculty and admitted to advance standing. Their levels of admission should be determined by the policies of the faculty, and they should be provided the regular educational opportunity and challenge deemed necessary for the awarding of the M.D. degree."
