ANNUAL ANNOUNCEMENT
OF THE
TRUSTEES AND FACULTY
OF THE
Medical College
OF THE STATE OF
SOUTH CAROLINA.
SESSION OF 1880-'81.

CHARLESTON, S. C.
WALKER, EVANS & COGSWELL, PRINTERS,
Nos. 3 Broad and 109 East Bay Streets.
1880.
College of Charleston, S. C.
Chartered 1785. Re-Organized 1837.

HON. W. D. PORTER, President of the Board of Trustees.
N. R. MIDDLETON, LL.D., President of the College, Professor of the Evidences of Christianity, and Harry Professor of Moral, Intellectual and Political Philosophy.
LEWIS R. GIBBES, M. D., Professor of Astronomy, Physics and Chemistry.
FREDERICK A. PORCHER, A. M., Professor of History and Belles Lettres.
FRANCIS W. CAPERS, A. M., Professor of Mathematics.
HENRY M. BRUNS, LL.D., Professor of the Latin and Greek Languages, and Literature.
A. SACHTLEBEN, Professor of Modern Languages.
L. A. FRAMPTON, M. D., Librarian.
GABRIEL E. MANIGAULT, M. D., Curator of the Museum.

The Annual Exercises are divided into two terms: The first commencing on the day after the last Tuesday in March, and closing on the 1st day of July; and the second commencing on the 1st of October, and closing on the last Tuesday in March, which is Commencement Day.

The Museum of Natural History in the College building contains the most extensive and valuable collection in the South.

TUITION TEN DOLLARS PER QUARTER.

Good Board may be had in the city at very reasonable rates: $4.00 to $7.00 a week.

For further particulars, apply to
N. R. MIDDLETON, LL.D.,
President College of Charleston.

Dr. H. BAER,
Wholesale Druggist
Nos. 131 and 133 Meeting Street,
Charleston, S. C.,
Dealer in
Drugs, Medicines,
Foreign and Domestic Chemicals,
Essential Oils, Glassware, Spices, Brushes,
Surgical Instruments,
Perfumery, Fancy Goods,

And all Articles Usually Found in a First-Class Drug House.

Surgical Instruments—Being Agent for GEO. TIEMANN & CO., of New York, has on hand a Full Assortment of Instruments from this Well-Known Factory.

I spare no pains in the selection of the Drugs, Medicines and Chemicals I offer for sale, being aware of the importance to Physicians of having the best and most reliable articles. In Medicine quality is of more consequence than quantity, hence, every article I offer for sale is thoroughly tested. I keep no second-class goods.

I invite orders from Druggists, Physicians, Country Merchants and Private Families. Every order, never mind how small, shall have prompt and careful attention.

Prices Low! Quick Sales and Small Profits!

MEDICAL FACULTY.

R. A. Kinloch, M. D.,
Professor of the Principles and Practice of Surgery and Clinical Surgery.

J. P. Chazal, M. D.,
Professor of Pathology and Practice of Medicine, and of Clinical Medicine.

Middleton Michell, M. D.,
Professor of Physiology.

C. U. Shepard, Jr., M. D.,
Professor of Chemistry.

F. L. Parker, M. D.,
Professor of Anatomy.

J. Ford Prioleau, M. D.,
Professor of Obstetrics and Gynaecology.

F. Peyre Porcher, M. D.,
Professor of Materia Medica and Therapeutics.

Manning Simons, M. D.,
Demonstrator of Anatomy.

H. D. Geddings, M. D.,
Assistant to the Professor of Chemistry.
MEDICAL COLLEGE
OF THE
STATE OF SOUTH CAROLINA.

ANNOUNCEMENT
OF THE
SESSION OF 1880-81.

The fifty-second Course of Lectures in this Institution will begin on the 15th of October, 1880, and end early in March, 1881, embracing a period of twenty weeks. A postponement until the 1st November would only take place in the event of a dangerous epidemic, regarding which accurate information can be obtained on application to any one of the Professors. The Faculty caution students against placing reliance on rumors and newspaper reports, which are often groundless, always exaggerated.

In issuing the present Announcement the Faculty again congratulate the alumni and friends of the College on the arrangement made, in February, 1879, with the City Council of Charleston. A contract was then entered into by both parties for a period of years, by which the Faculty supply the City Hospital with medical and surgical attendance free of charge, while the financial management is entirely left to the agents of the City Council, viz., at the present, a Special Board of Hospital Commissioners appointed in the Spring. These gentlemen have entered upon their duties with marked zeal, energy and initiative. The arrangement above mentioned enables the Faculty to give their undivided attention to an abundant and valuable clinical material, which will be made available in every way consistent with humanity that experience will suggest. Frequent Clinical Lectures will be delivered during the course.

The Didactic Lectures, an indispensable foundation to the clinical attendance, will receive the same attendance as heretofore. These, however, must necessarily interrupt somewhat the study of disease at the bedside, and we would advise medical students to spend some time in attendance on the hospitals after the close of the lectures, and thus devote themselves entirely to clinical study. In illustration it may be stated, that since the commencement in March, nu-
merous important surgical operations have been performed by the surgeon in charge, at which the students present, could, without being interrupted, witness all the manipulations which follow the use of the knife.

For the present the year is divided into three periods of four months, during each of which two members of the Faculty are in charge of the medical and the surgical wards, the insane department being allotted to the medical, the lying-in department to the surgical officer. The regular Clinical Lectures will begin on the 1st of November and end about the 1st of March, during which time the Medical and Surgical Wards will be in charge of the Professors of Practice and of Surgery. Besides their Clinical Lectures there will be given every week one or more Gynaecological Clinics by the Professor of Gynaecology, and one on Diseases of the Eyes and Ear by Professor Parker.

Four house physicians are attached to the Hospital, who are chosen every March in the order of their proficiency from among the graduates who apply for the position.

The present incumbents are Drs. H. D. Geddings, of Charleston; Goldsby King, of Selma, Alabama; J. L. Thompson, of Halls ville, S. C., and W. H. Burgess, of Stateburg, S. C.

For the benefit of the pharmaceutical students and beginners in the study of medicine, during the past winter a weekly lecture on Medical Botany was delivered by Prof. F. P. Porcher, and work in the Chemical Laboratory, two mornings each week, was done under the supervision of Prof. C. U. Shepard, Jr., the only charge here being a small amount to defray the cost of chemicals.

With the facilities now at the command of the College we hope to deserve the patronage of medical students, particularly of those whose special interest it is to study comparatively the diseases of the two races, who, in many respects, differ both physiologically and pathologically. The mildness of the Charleston winter, its polished society, rational amusements, amply sufficient for all purposes of relaxation, might induce students from all parts of our country to visit our Institution.

The expenses of the school have been by the concurrent action of Western and Southern schools raised from fifty to seventy-five dollars for Professor's Tickets. This advance is a matter of justice to the teachers, and seems warranted by the financial improvement of our Southern land. As the charge now stands, it is far less than in the majority of Northern Colleges.

We publish at the end of this Announcement the articles of agreement of the American Medical College Association of which this Institution is a member. It would be of great advantage to the cause of medical progress in this country were the large majority of its medical schools, about sixty in number, to lend their support to the object which this valuable body is striving to attain. We also publish a list of the thirty-one Colleges which now belong to the Association.
MUSEUM.

The Museum contains a valuable collection of preparations and models illustrative of points in Anatomy, Physiology, Pathology, and Practical Surgery. The figures and models in wax are choice preparations. The pathological specimens, both wet and dry, are being continually added to. The collection illustrative of injuries and diseases of the osseous system is especially large and instructive. The teratological collection (monstrosities) is exceptionally large. Students have access to the Museum at any time during the session, and may thus secure an early familiarity with the structure both of healthy and diseased parts.

ANATOMICAL ROOMS.

The Anatomical Rooms will be opened during the entire session for the prosecution of practical anatomical studies under the guidance of a Demonstrator of long experience. An abundant supply of material for the wants of this most important department can be safely ensured.

CHEMICAL LABORATORY.

The Professor of Chemistry has supplied his department with the best and most recent physical and chemical apparatus, the utility of which the Professor enhances by periodical and gratuitous conversations and examinations.

CITY HOSPITAL.

This Institution, which is in great measure supported by the city, covers an area of over two acres, and is situated in a quiet and well ventilated neighborhood. It is composed of a white and a colored department, separated from each other by a large central garden. The former, the Roper Hospital, adjoining the Medical College, faces on Queen street, from which it is somewhat removed by a fine flower garden, while the colored department faces on both Magazine and Mazyck streets. In this and facing on Magazine street is the insane department, sufficiently remote from the ordinary sick wards. The lying in department, occupies in part, a separate building on Mazyck street, between the white and colored departments. Great care is bestowed on the hygiene of the Institution, which will be materially improved when, at no distant day, an abundant supply of pure water will be brought to it from one or more artesian wells. An excellent bakery has for years been in operation on the premises, which supplies wholesome bread to the Hospital and other city institutions. The capacity of the Hospital is for three hundred patients, one hundred and fifty being about the daily average. The large amount of shipping in port during the fall, winter and spring sends many
cases of interest to the Institution. Many important surgical operations are performed during the lectures, and, indeed, throughout a year.

EXPENSES OF THE SCHOOL.

The expenses of the Course of Instruction for the session is as follows:

Matriculation Fee (paid once only).......................... $5 00
Entire Course of Lectures, including Demonstrator's ticket and Hospital advantages........................................ 75 00
Graduating Fee.................................................. 30 00

The fees must be paid in advance, except the Graduating Fee. This must be deposited with the Dean previously to the candidate presenting himself for examination.

N. B.—None of the Professors have private tickets, or receive fees from students, unless such as may be exacted for yearly office instruction.

REQUIREMENTS FOR GRADUATION.

1st. The applicant must be twenty-one years of age, and have had a preliminary education satisfactory to the Faculty.
2d. He must have studied medicine for three years under the supervision of some respectable regular practitioner, including the time spent in the attendance on lectures.
3d. He must have attended two full courses of lectures at a medical school, approved by the Faculty, the last of which has been in this Institution. (No school will be admitted upon the ad·
4th. His examination on all the branches, attendance upon lec·
5th. The Faculty will give a prize to the candidate for graduation that passes the best examination.

TEXT BOOKS.

Anatomy—Sharpy and Quain's, or Gray's Anatomy; Todd and Bowman's Physiological Anatomy.
Surgery—Erichsen's, Gross's, Bryant's, Ashurst's, or Holmes' Surgery; Billroth's Surgical Pathology. Practical Medicine—Green's Pathology and Morbid Anatomy, (Henry C. Lea, Philadelphia); Orth's Diagnosis in Pathological Anatomy, (Hurd & Houghton, Boston); Niemeyer's Text Book
of Practical Medicine; Flint's Practice; Dacosta on Medical Diagnosis.

Physiology—Kirke' and Paget's Physiology, or Dalaton's Physiology.

Materia Medica—Biddle's Materia Medica; Stille's Materia Medica and Therapeutics.

Chemistry—Fowne's Chemistry, or Witthaus' Essentials of Chemistry.

Gynaecology—Thomas or Barnes on Diseases of Women.

Obstetrics—Shroeder, or Leishman's Midwifery.

Good board can be obtained in the city for $4 per week.

J. P. CHAZAL, DEAN.

70 Hazel Street.

The Commencement exercises of the Medical College of the State of South Carolina, took place at the Academy of Music, on the evening of the 4th March last. The usual affluence was present. The exercises were opened with prayer by the Rev. E. T. Horn. The Dean then made his report, at the end of which, he recommended twenty-one gentlemen for the Diploma of Doctor of Medicine, and four others for the Diploma in Pharmacy. These degrees were conferred by the Hon. H. D. Lesesne, President of the Board of Trustees.

Philip Wineman, Jr................................................South Carolina.
M. E. Withington...................................................South Carolina.

E. Horry Frost, Esq., one of the Trustees, next delivered an excellent address to the Graduates.

He was followed by the Dean, who stated that the successful competitor for the prize for the best examination, was Dr. H. D. Geddings, of Charleston, and that in the same competition, the Faculty made honorable mention of the three following gentlemen: Drs. L L. Williams, of Georgetown, S. C.; Goldsby King, of Selma, Ala.; H. O. Kinloch, of Charleston, S. C.

The prize, a silver goblet, was presented by the Dean to Dr. Geddings, with a few suitable remarks.

The valedictorian, Dr. H. Tracy Ivy, next came forward, and delivered himself of his task in excellent words and taste.

The exercises of the pleasant evening were closed with the benediction by the Rev. Mr. Horn.
At a meeting of the Graduating Class of 1880, held on March 5th, 1880, Dr. William E. Wright in the chair, and Dr. B. B. Lee, Secretary, the following preamble and resolutions proposed by Dr. Edmund Mazyck, were unanimously adopted:

Whereas, Inasmuch our duties are now to separate us from each other, and from the fostering care of our Alma Mater, we desire to express our feelings of sincere affection and gratitude for the pleasant, courteous and thorough discharge of duty on the part of her Professors.

Resolved, That the Faculty of the Medical College of the State of South Carolina we offer our hearty thanks for the interest manifested in our behalf, and our admiration for their zeal and efficiency as instructors.

Resolved, That to ex-Prof. C. U. Shepard, Sr., we are kindly indebted for his entertaining lectures, manifesting thereby, an interest in us, and in the welfare of the College, which we heartily appreciate To Dr. Manning Simons also, as a thorough, practical, genial and instructive Demonstrator of Anatomy, we are sincerely indebted.

Resolved, That our thanks be presented to E. H. Frost, Esq., for his chaste and appropriate address; and that a copy of these resolutions be submitted by the Secretary to our worthy Dean, with the request that he record them in his next Annual Announcement of the College.

WILLIAM E. WRIGHT, M. D., Chairman.

B. B. LEE, M. D., Secretary.

ARTICLES OF CONFEDERATION.

(TO BE SUBSCRIBED, PUBLISHED FOR THREE YEARS, AND CONFORMED TO BY ALL THE COLLEGES OF THE ASSOCIATION)

ARTICLE I.—Of the Faculty.

The medical members of the Faculty must be regular graduates or licentiates and practitioners of medicines, in good standing, using the word "regular" in the sense commonly understood in the medical profession.

ARTICLE II.—Tuition.

Section 1. The scheme of tuition shall provide for a yearly systematic course of instruction covering the general topics of Anatomy, including dissections, Physiology, Chemistry, Materia Medica and Therapeutics, Obstetrics, Surgery, Pathology and Practice of Medicine. The collegiate session wherein the course is given, shall be understood as the "regular" session.

Sec. 2. Said Regular Session shall not be less than twenty weeks in duration. This section to go in force at and after the session of 1879-80.

Sec. 3. Not more than one regular session, counting the regular session as one of the two courses of instruction required for graduation, shall be held in the same year.

ARTICLE III.—Requirements for Graduation.

No person, whether a graduate in medicine or not, shall be given a diploma of "Doctor of Medicine" who shall not have fulfilled the following requirements, except as hereinafter provided for in Article IV.

1. He must produce satisfactory evidence of good moral character, and of having attained the age of twenty-one years.

2. He must file a satisfactory certificate of having studied medicine for at least three years under a regular graduate or licentiate and practitioner of
medicine, in good standing, using the word "regular" in the sense commonly understood in the medical profession. No candidate shall be eligible for final examination for graduation unless his term of three years' study shall have been completed, or shall expire at a date not later than three months after the close of the final examinations. This clause to take effect at and after the session of 1879-80.

3. He must file the proper official evidence that, during the above-mentioned three years, he has matriculated at some affiliated college, or colleges, for two regular sessions; and in the course of the same (except as provided in 4), has attended two full courses of instruction on the seven topics mentioned in Article II. But the latter, at least, of the two full courses must have been attended at the college issuing the diploma. No two consecutive courses of instruction shall be held as satisfying the above requirements, unless the time between the beginning of the first course and the end of the second is greater than fifteen months.

4. In case a college shall adopt a systematic graduated scheme of tuition, attendance on the whole of the same shall be equivalent to the requirements mentioned in 3; provided, such scheme includes instruction in the seven topics mentioned in Article II., and requires attendance at least two yearly regular collegiate sessions of not less than twenty weeks' duration each.

5. The candidates must have passed a personal examination before the Faculty on all seven of the branches of medicine mentioned in Article II.

6. He must have paid in full all college dues, including the graduation fee.

ARTICLE IV.—HONORARY DEGREES.

An honorary degree of "Doctor of Medicine" may be granted in numbers not exceeding one yearly, to distinguished physicians or scientific men of over forty years of age. But, in such case, the diploma shall bear across its face the word "honorary" in conspicuous characters, and the same word shall always be appended to the name of the recipient in all lists of graduates.

ARTICLE V.—OF FEES.

SECTION 1. All fees shall be paid in lawful money, and no promissory notes or promises to pay shall be accepted in lieu of cash for payment of fees.

SEC. 2. No ticket or other certificate of attendance upon college exercises, shall be issued to any student until the dues for the same shall have been fully paid.

SEC. 3. The established fees for the exercises of the regular session, except the matriculation fee, graduation fee, fee for dissections, may be reduced not more than one-half to graduates of other affiliated colleges of less than three years' standing, and to undergraduates of the same who have already attended two full courses of the instruction of the regular session.

SEC. 4. The same fees may be remitted altogether to a college's own alumni, to graduates of other affiliated colleges of three years' standing—the three years dating from the time of graduation and ending at the close of the regular session for which the tickets are given—to undergraduates who have already attended two full courses of the instruction of the regular session, the latter of which, at least, shall have been in the college making the remission, and to theological students when not candidates for a diploma.

SEC. 5. The same fees may be reduced or remitted to deserving indigent students, to a number not exceeding five per cent. of the matriculates at the previous regular session of the college.

SEC. 6. Under no circumstances whatever, other than the above, shall the Faculties, or any members of the same, grant, upon their own authority any remissions or reductions of established fees. And it is distinctly understood and agreed that the Faculties will discomfit and oppose the
authorizing by governing boards of the admission of individual students upon other than the regular established charges for their grade.

SEC. 7. Remission or reduction of fees for other exercises than those of the regular session, return to a student of any moneys after payment of fees, or an appropriation of funds of the college for payment of any student's fees, or part thereof, shall be deemed a violation of the provisions of this article in regard to remission or reduction of fees.

ARTICLE VI.—OF RECOGNITION OF OTHER COLLEGES.

No college shall admit to the privileges accorded in Articles III. and V. the students or graduates of any college which, during the period of the student's or graduate's pupillage, shall have been excluded from the list of affiliated colleges recognized by the Association.

ARTICLE VII.—ADVERTISEMENTS.

No college shall advertise in any other than a strictly medical publication the name of the professors, with their respective chairs.

ARTICLE VIII.—AMENDMENTS.

Amendments to these Articles shall be proposed and adopted in the manner prescribed for amendments to the Constitution.
