Survey Results ▌Medical Student Interest Group Funding Structures

Prepared by Sarah Williams, Alyssa Blood, and Regina Kwon, University of Colorado
Dates of administration: 5/5/2015-5/12/2015
N=12

The structures that medical student councils employ to fund student interest groups (SIGs) fall into five categories:
   □ Medical Student Council does not fund SIGs.
   □ Each SIG receives a flat, predetermined amount of money per year.
   □ Each SIG is funded based on the number of members they enroll.
   □ SIGs are funded based on the number and attendance of events they host.
   □ Each SIG receives a flat allowance plus an additional provision that is determined on an event-by-event basis.

Trends:
   □ The number of SIGs at each medical school varies from 15 to more than 50.
   □ Schools with large numbers of SIGs (>40) tend to fund the groups on an event-by-event basis.
   □ Of the schools that use an event-by-event funding structure, all of them set an upper limit for either the amount of money that can be allocated per event or the amount of money a SIG can receive in total per year.
   □ At schools where the medical student council does not fund SIGs, the SIGs seek funding from a variety of sources, such as:
      o Each group must seek independent funding (fundraisers, medical departments, etc.)
      o Student Affairs allocates money to SIGs
      o The Dean’s Fund allocates money to SIGs
   □ There is a wide variety in the amount of money that schools allocate to SIGs, regardless of the funding structure they employ.
